

masyado malapad yung header, tapos yung sa logo binago ko, nasa pinned messages naman yung link, like dapat yung logo din is nandon kunware dito sa sign in, yung mga “M” is dapat yung logo. Tapos yung font color pala minsan di nakikita gaya dito sa sign in. Tapos. pwede pa to dagdagan para di plain. Like parang yung 3rd pic dito, yung pina ai ko kay claude, siguro colors nga para di plain ganon. Like sa sign in and sign up dapat same ganon. Tapos pwede rin maglagay yung as in google na icon sa baba, like diretso sa google sign in ganon, yung parang sa ibang website na google acc na agad

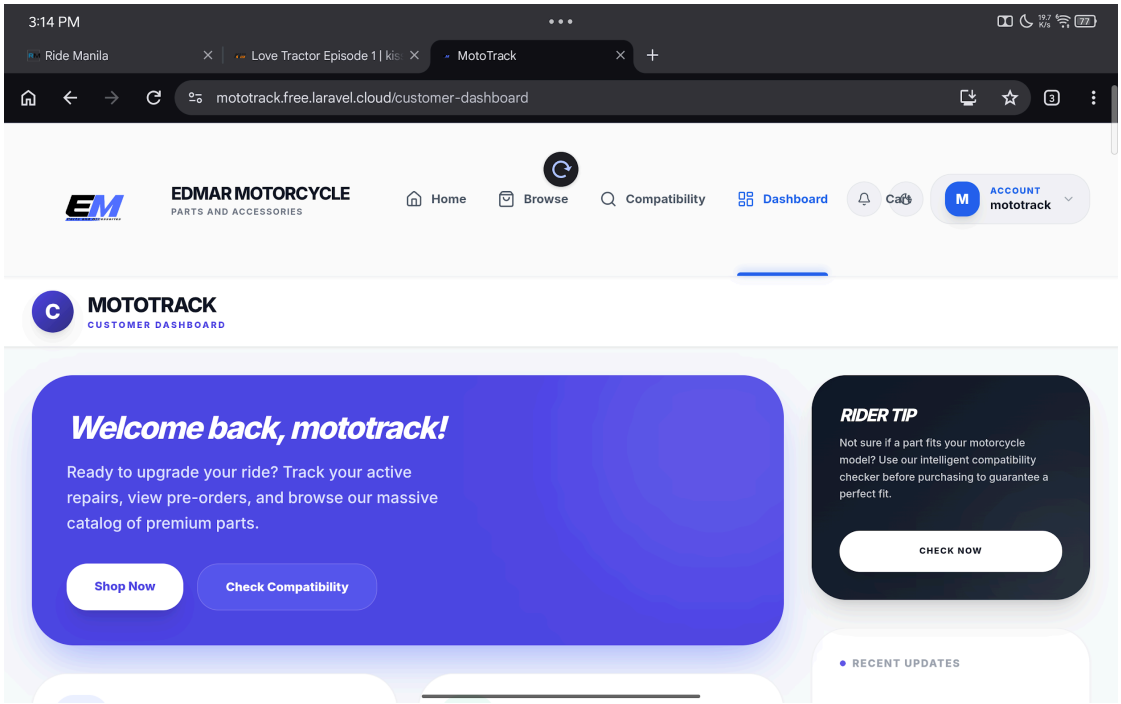

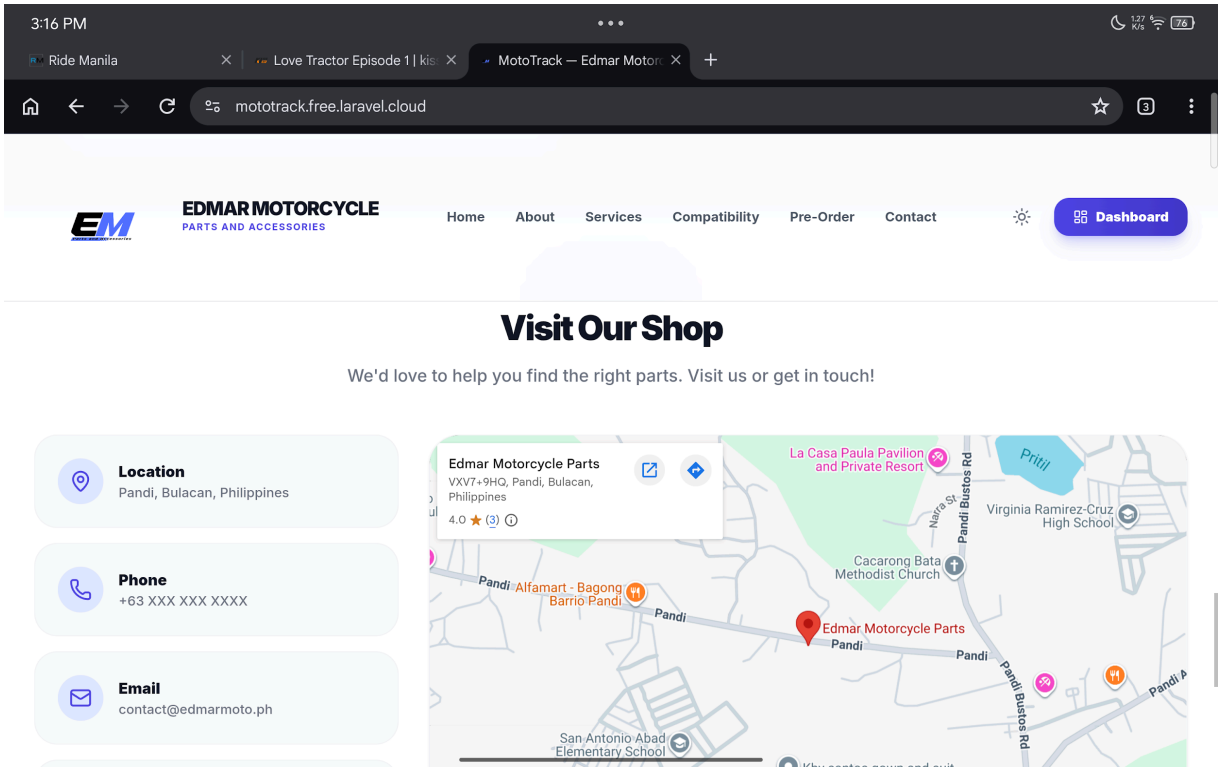

tas eto yung sa site na chinecheck ko for inspo, pwede na rin natin lagyan yung landing page ng cart na button, pero ang lalabaa pag clinick is need muna mag sign in/up. Basta check nalang din tong site for inspo

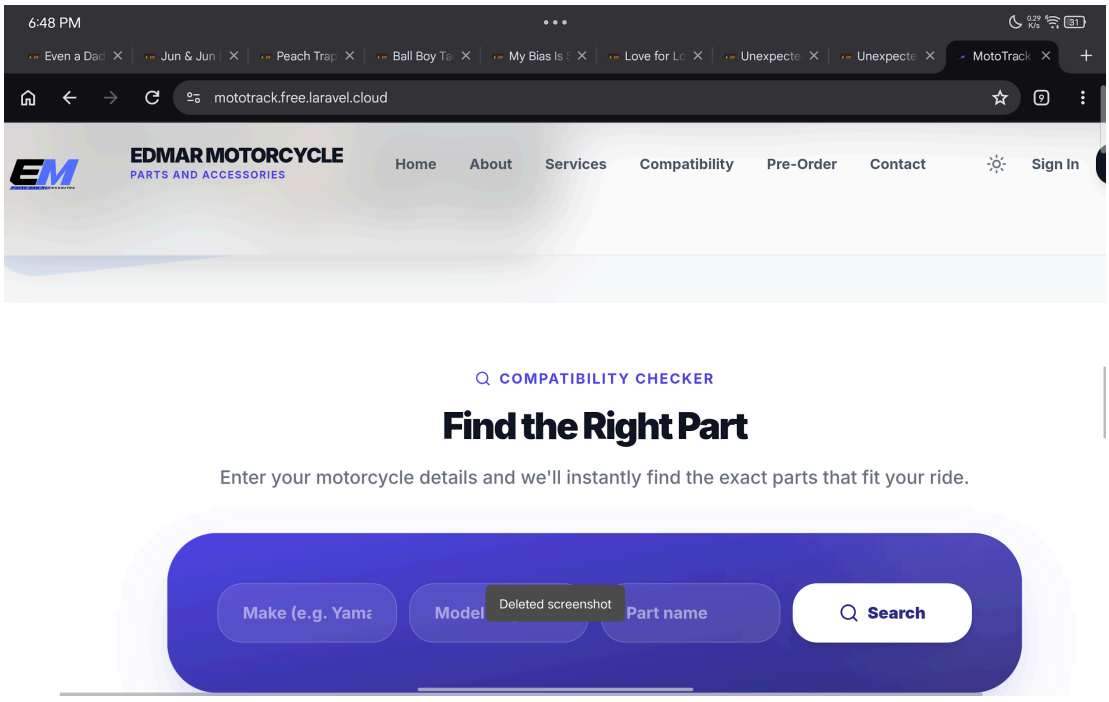

Tapos yung dito sa customer dashboard, yung sa may header, yung sa cart kahit icon nalang wala na yung word na “cart”. Tapos hindi nakikita yung cart dito. If kaya na maging responsive go na yon para pag napakita kay sir ayos na, like for mobile ganon, pc etc. Tapos like yung mga italicized na words not sure if okay lang

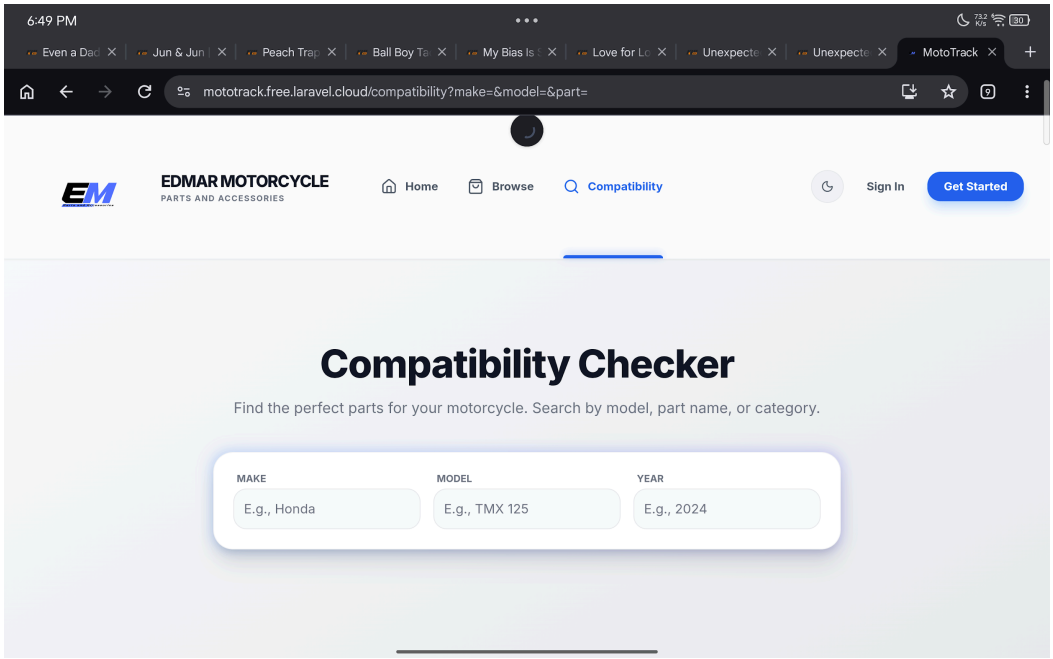

Tapos yung dito, yung number is 09776634982, yung email is edmarmotorshop@gmail.com

Abt sa compatibility keme, dapat pag clinick yung sa check compatibility sa landing page, pag may tinype yung customer sa 3 containers, lalabas agad yung results and pag wala, mag error or basta may lalabas na need mo fill up yung containers and dapat same same yung ui nung sa landing page sa compatibility checker sa customer dashboard. Basta like ganon
