- yung header/navbar is ifix position sa landing page sa desktop and mobile kasi di nakikita once na mag scroll down. see second pic, ganon dapat

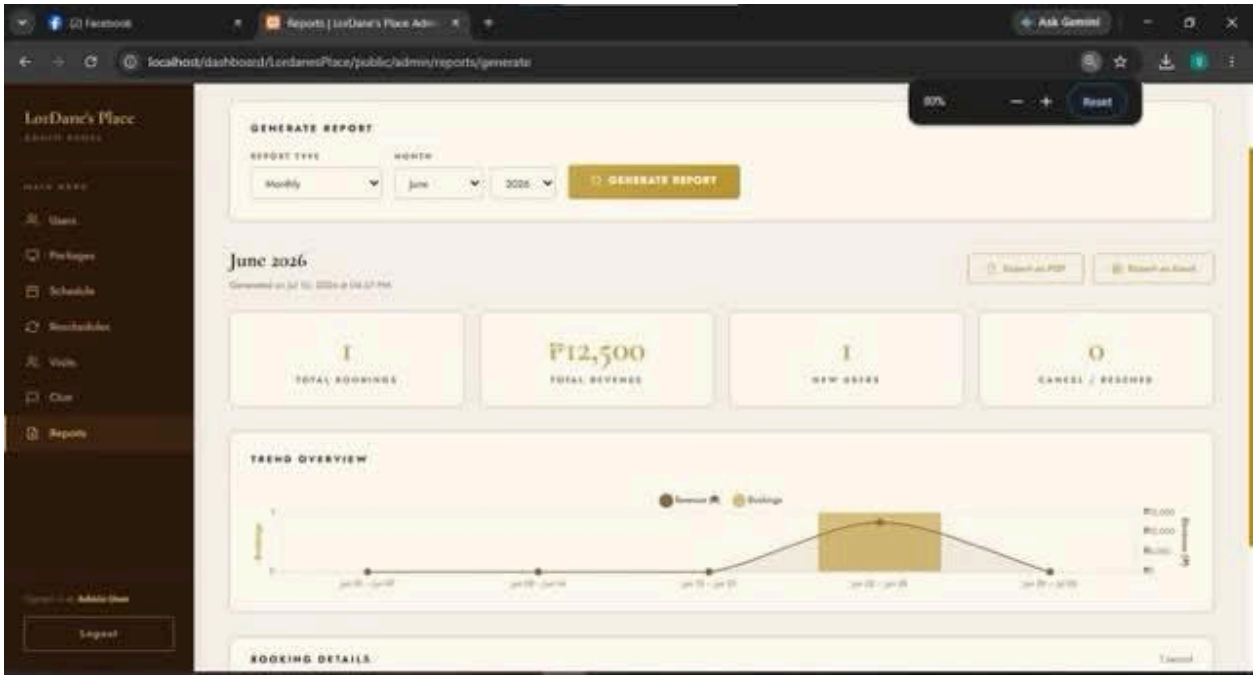

- yung forgot password nawala, need yon, aayusin lang

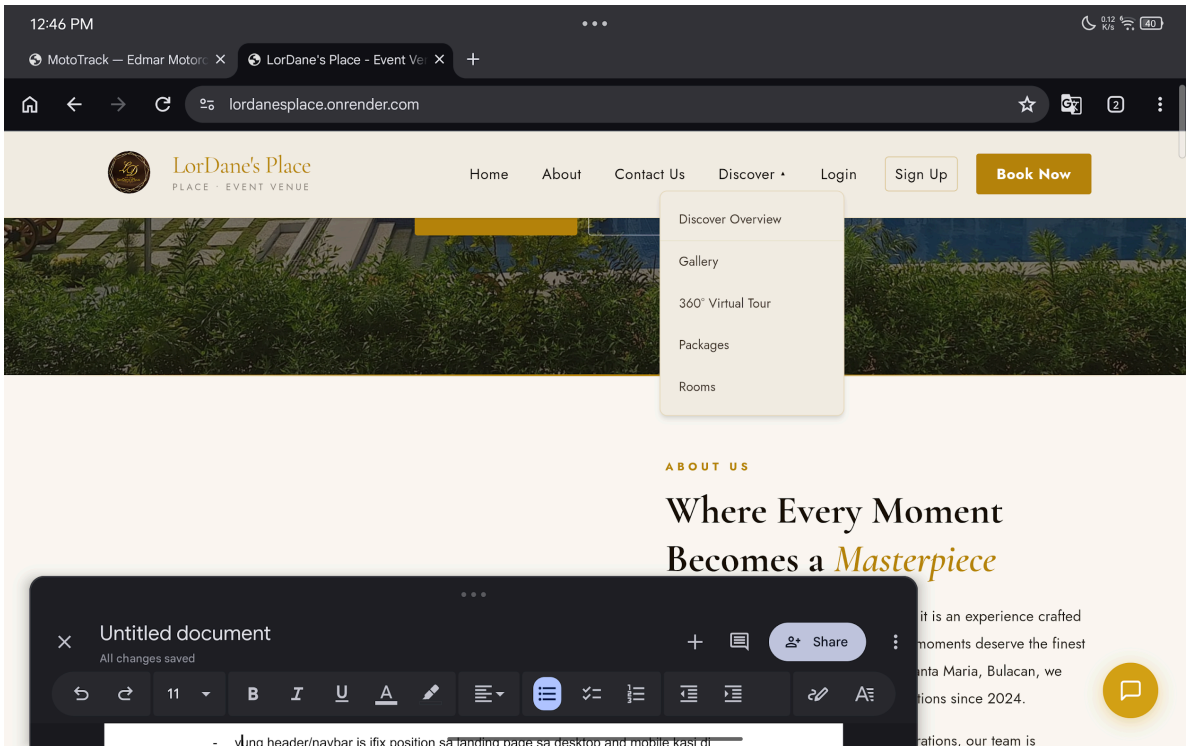

- yung sa admin and customer dashboard naka left side panels nalang. parang ganto

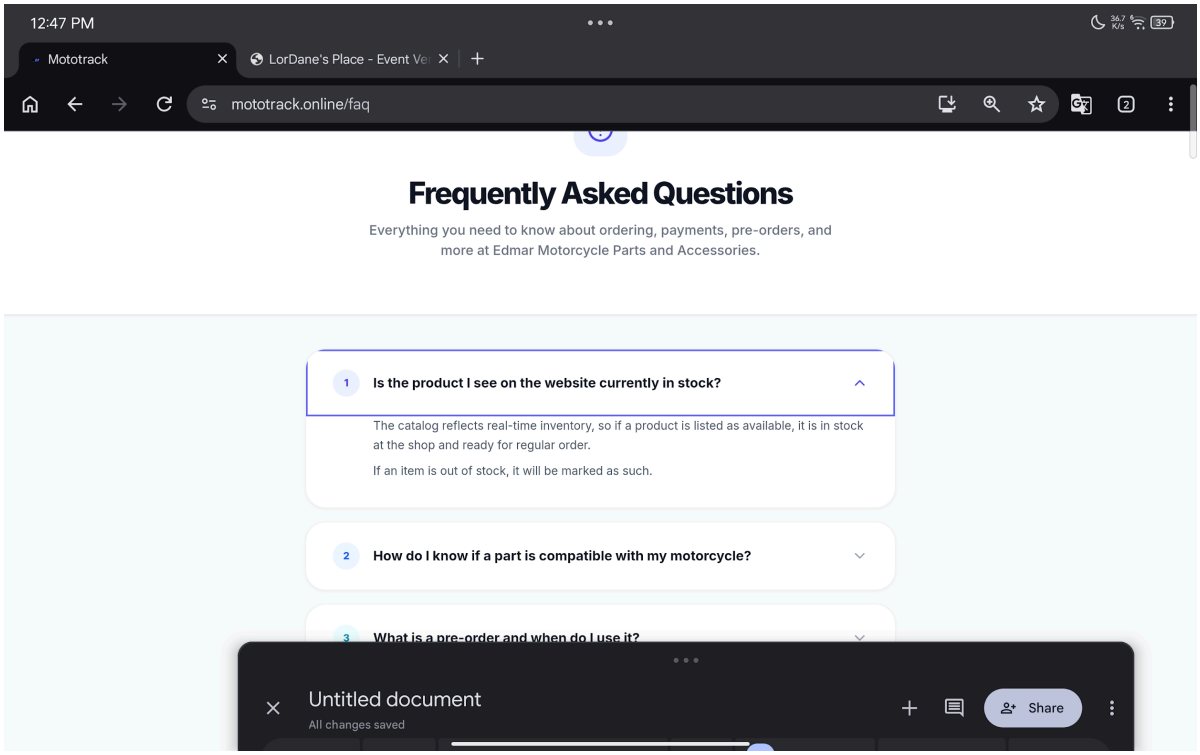

- yung sa admin wala dapat yon cart icon since sa customer lang yon. siguro parang ganito nalang sa taas, like iba ui nung admin dashboard sa customer dashboard

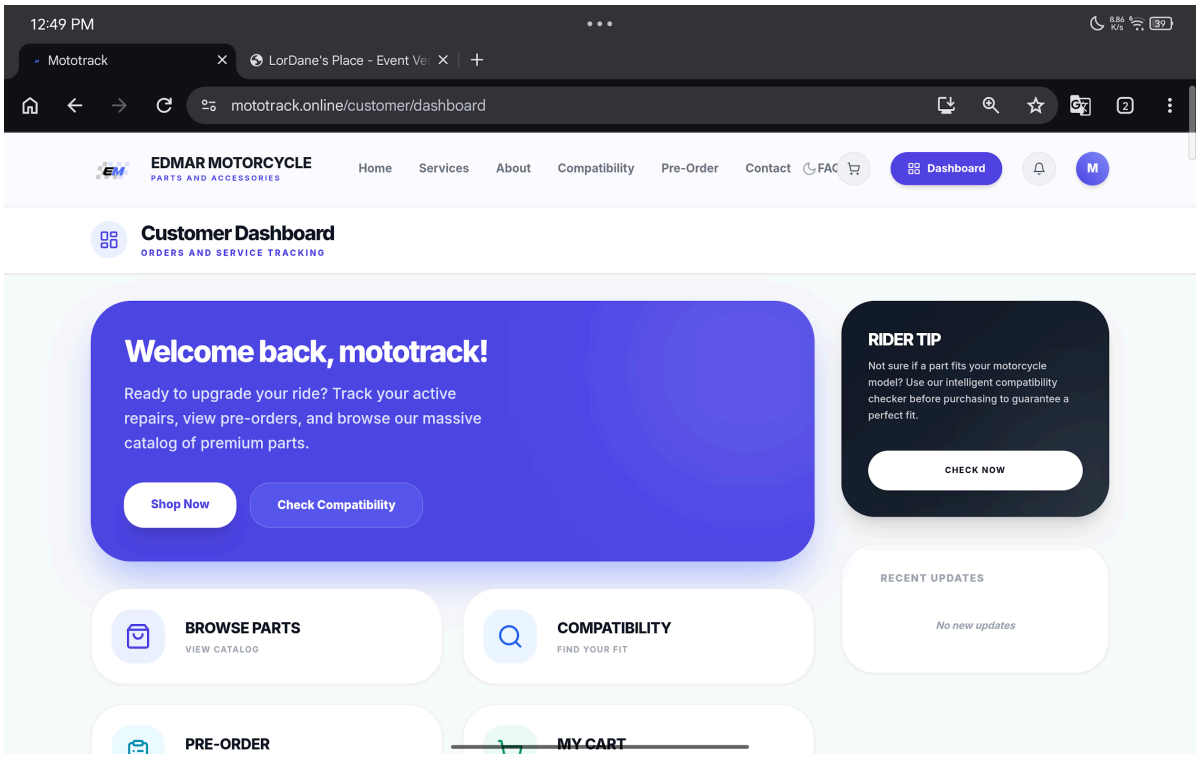

- yung faq is isama sa "about" lagyan nalang ng drop down yung about sa header/navbar. parang eto na nasa picture, yung sa may discover may arrow

- alisin yung highlights sa borders sa faq once clinick and sa iba if may ganung instances din

- need ayusin yung faq para di ganto yung header/navbar. tapos yung left side panel need ibahin

- lagyan compat checker yung mismong admin panel. lagyan “compatibility” sa may header/navbar dito sa admin
