Dito yung sa pag naka dark mode na, yung logo ganyan, need maiayos

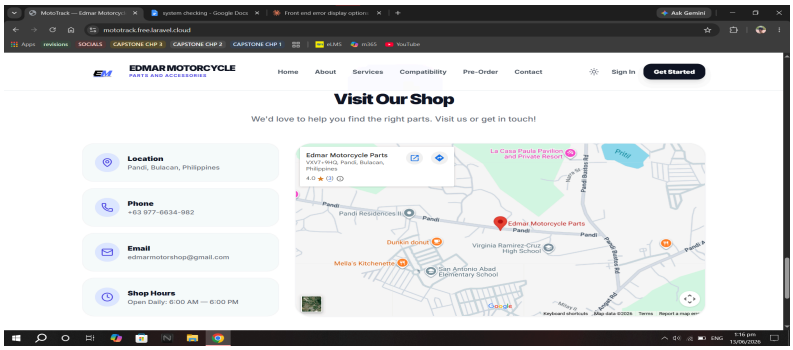

And yung dito naman sa compatibility checking, wag na yung ganon sa baba, yung red, like gawin nalang na mag eerror yung mismong box

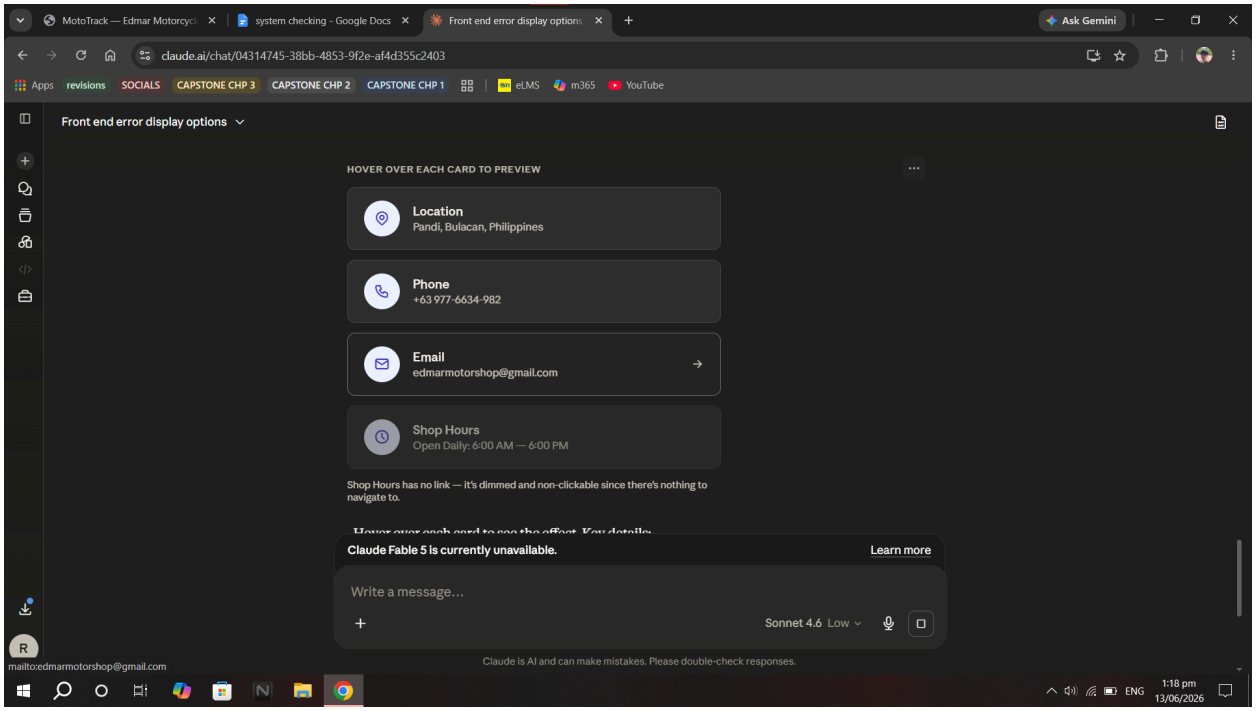

Eto example galing kay claude

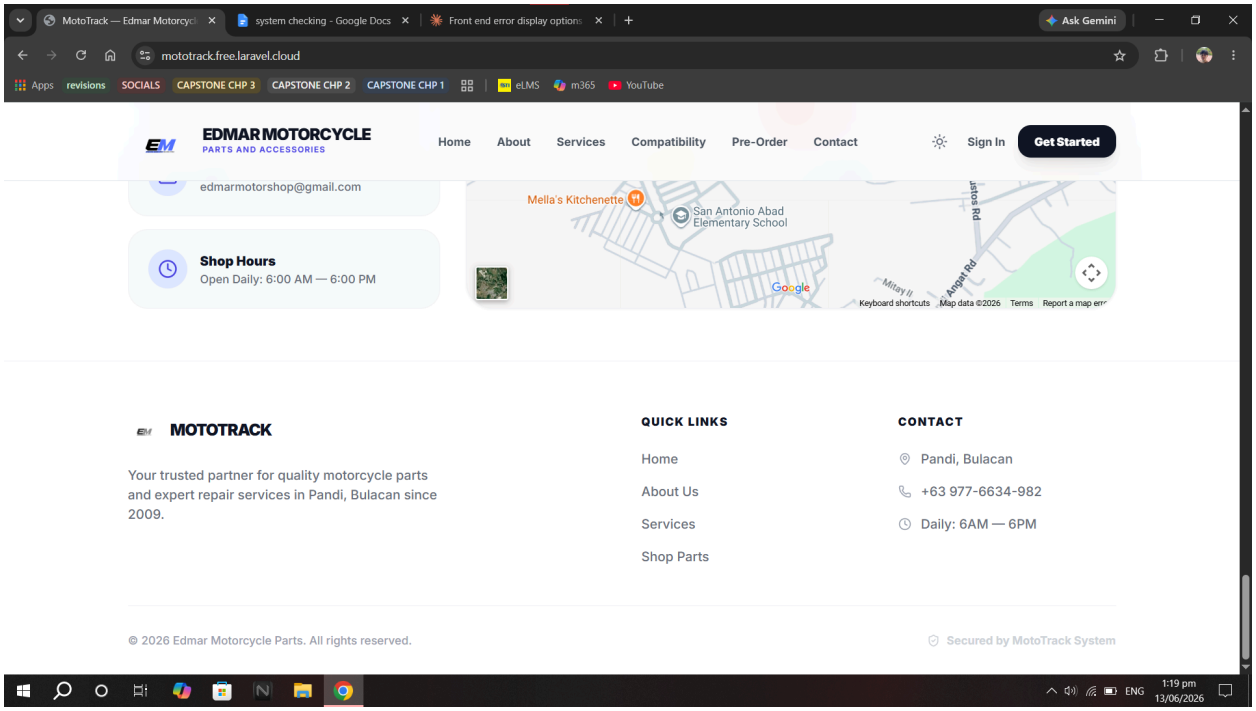

Yung dito naman pwede gawing clickable yung sa email, like pwede mag send agad ng email pag clinick yung sa email

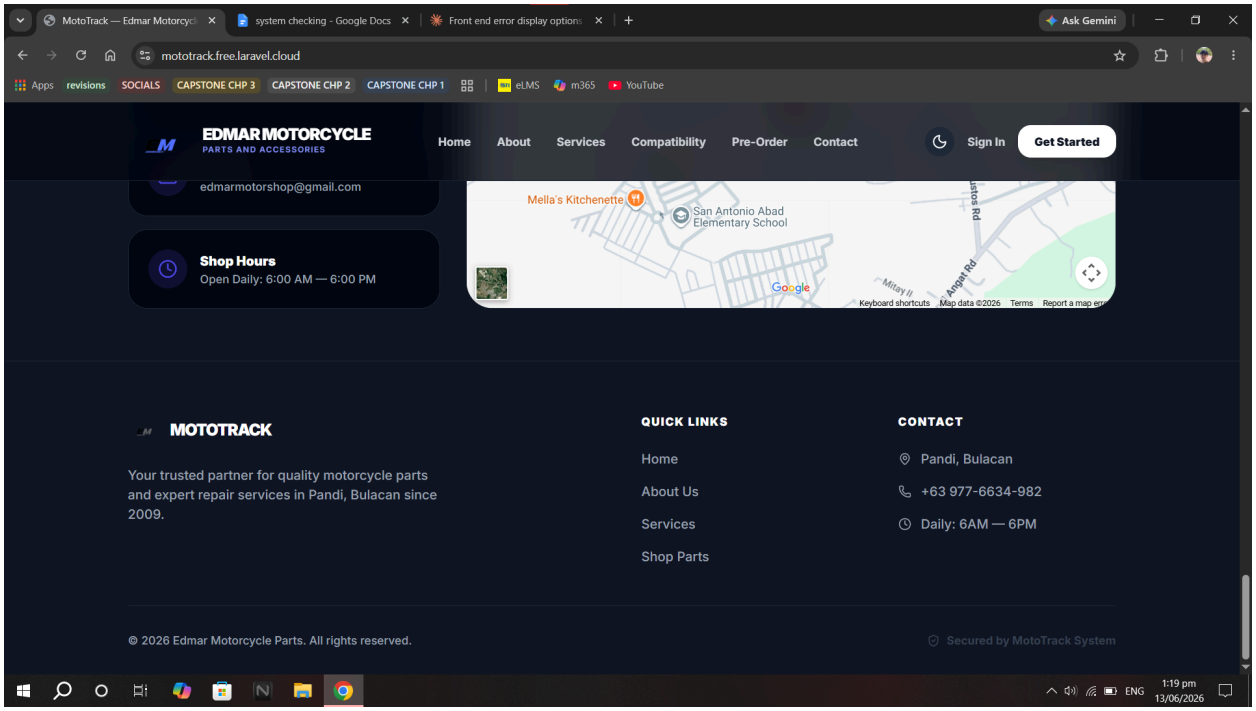

Like ganto yung mangyayari

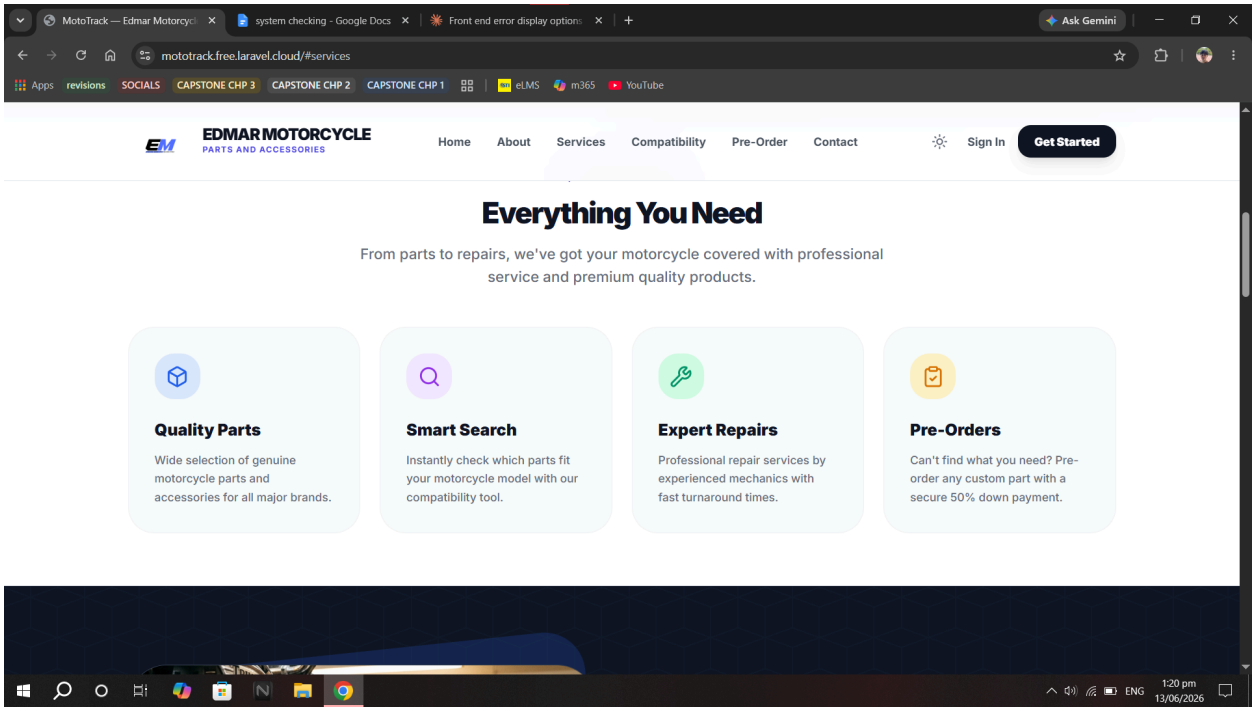

Tapos yung dito sa dulo, sa footer, need same logo lang gamit.overall, need ayusin logo pag naka dark mode

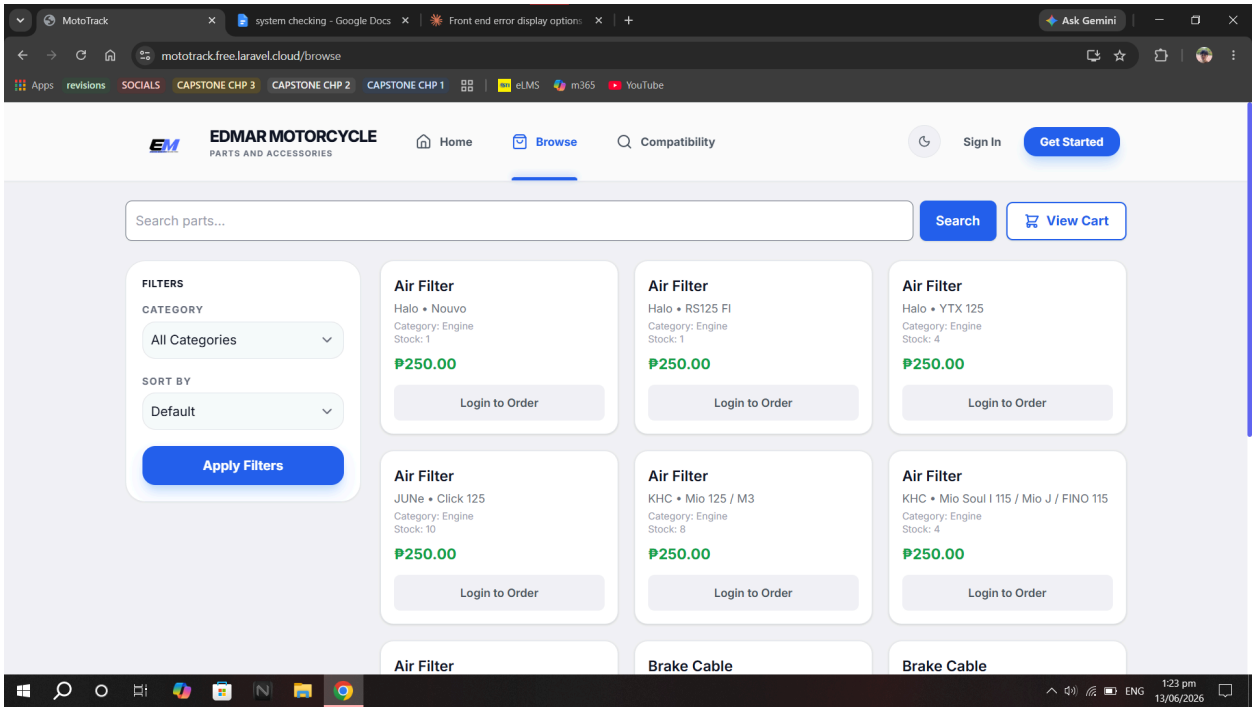

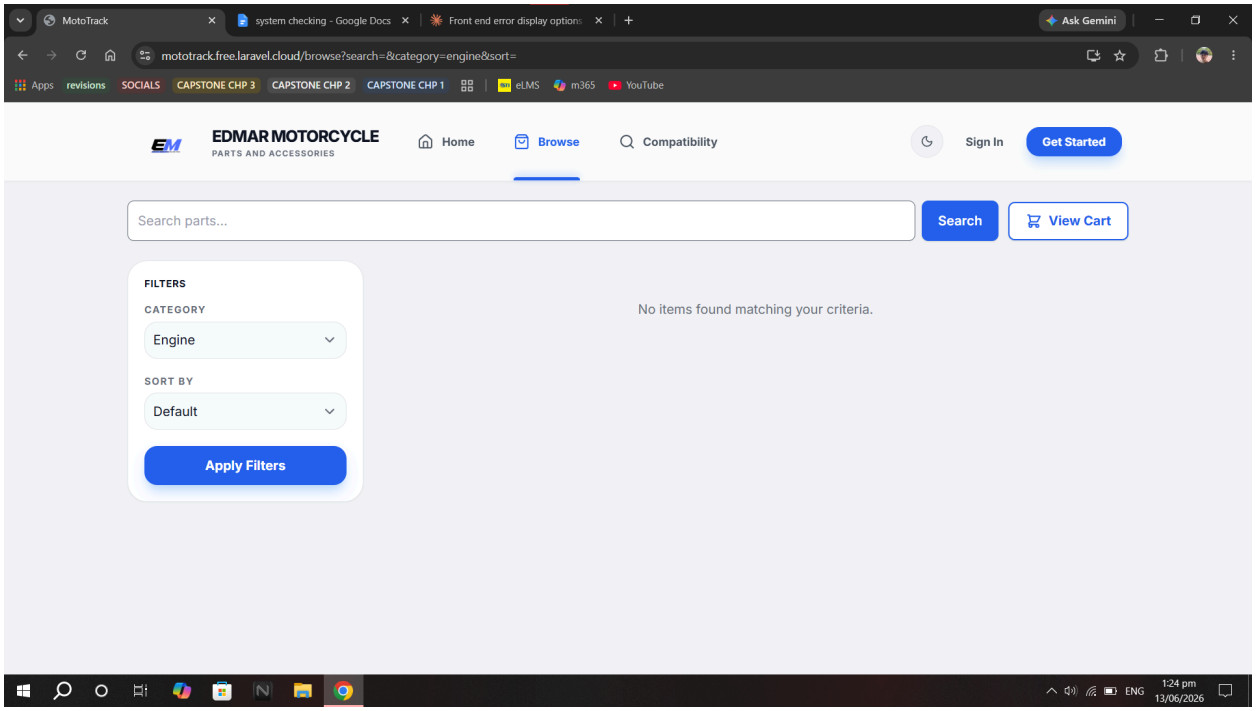

Tapos yung dito pala, mas nauna yung services kesa sa about sa header, pero sa mismong landing page, nauuna yung services na part. Better if switch nalang para maayos yung flow pag cliniclick sa header. Home-services-about and so on

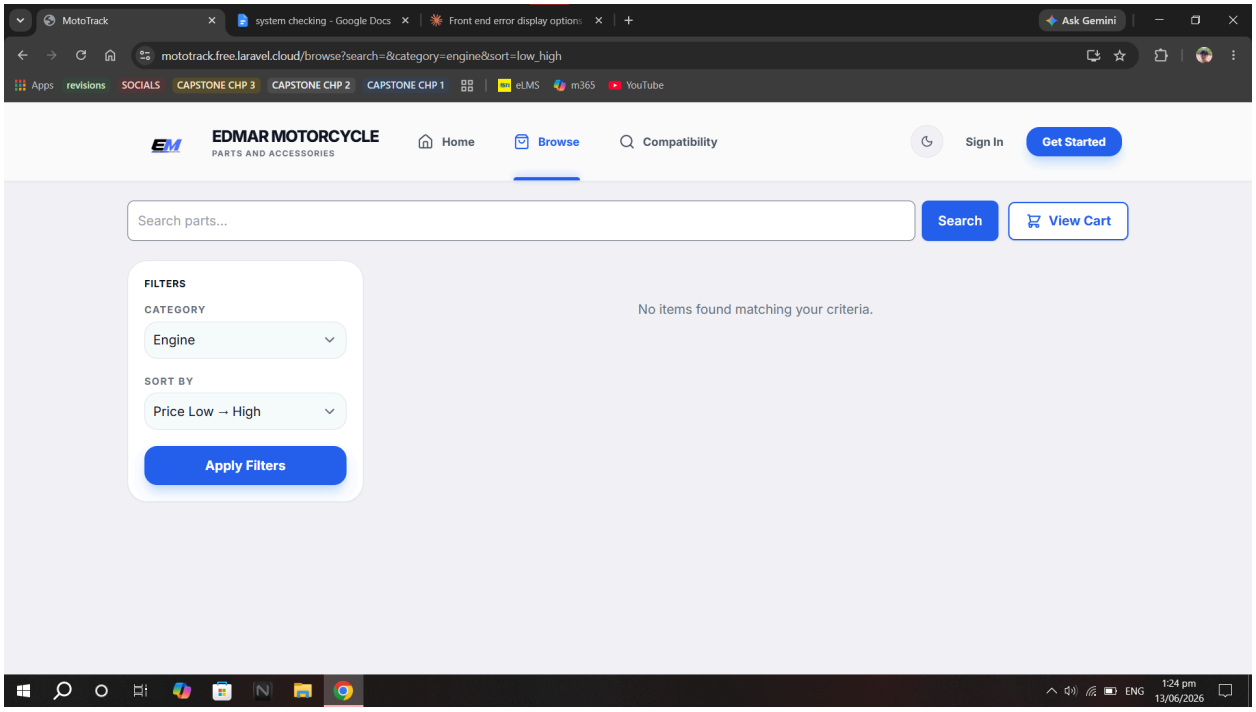

Tapos yung dito naman, need maiayos yung sa header talaga, masyadong malayo spacing, check nalang sa picture dito

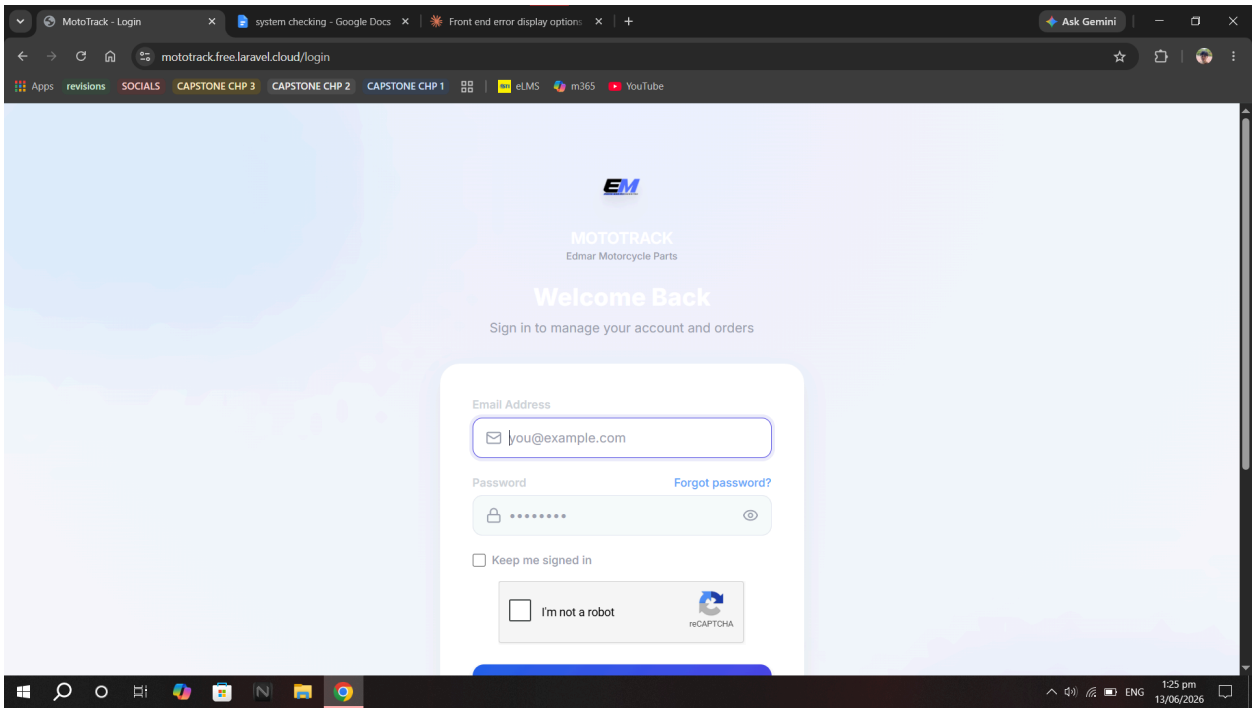

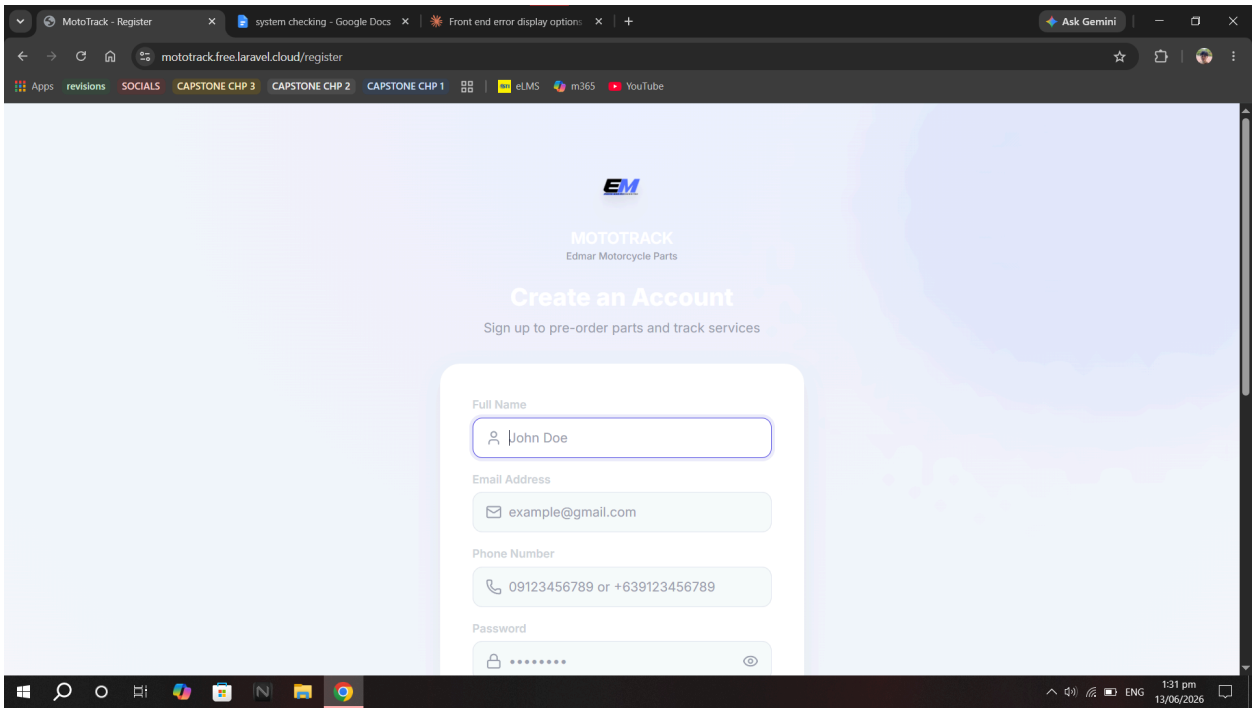

Yung dito naman pag ginamit yung filter, walang lumalabas

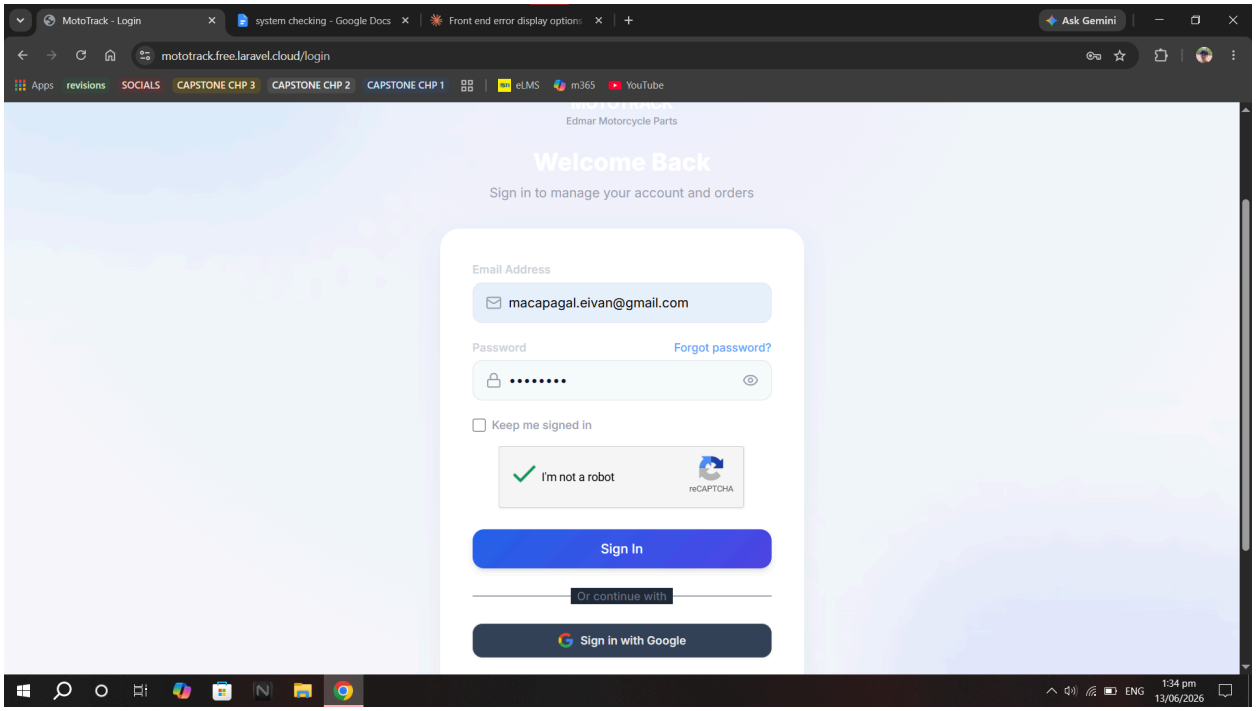

Yung sa login/sign up page, need maiayos responsiveness, based sa pictures, ganyan lumalabas, kahit sa phone. Like hindi siya swak, basta responsiveness prob here. And ewan bakit affected whether naka dark mode yung device ko, pag light mode nag bback to normal naman yung mga text, gaya nitong sa login and register, white texts pag dark mode, check nalang din about don

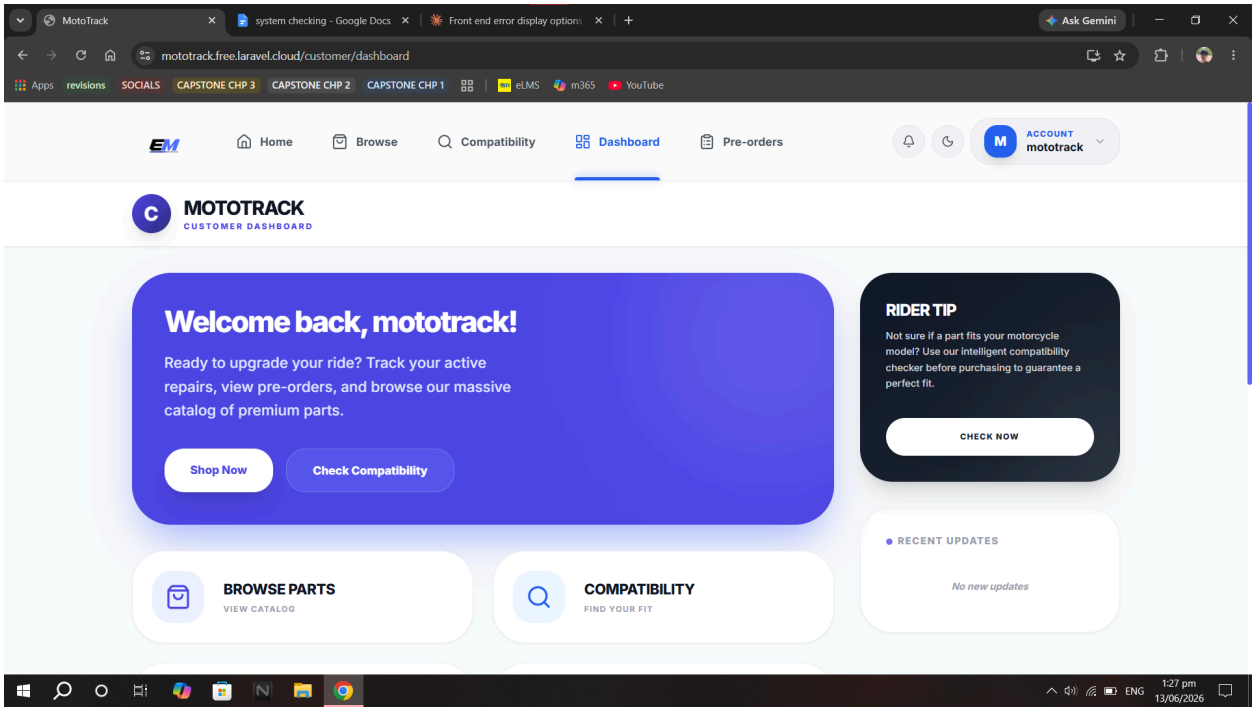

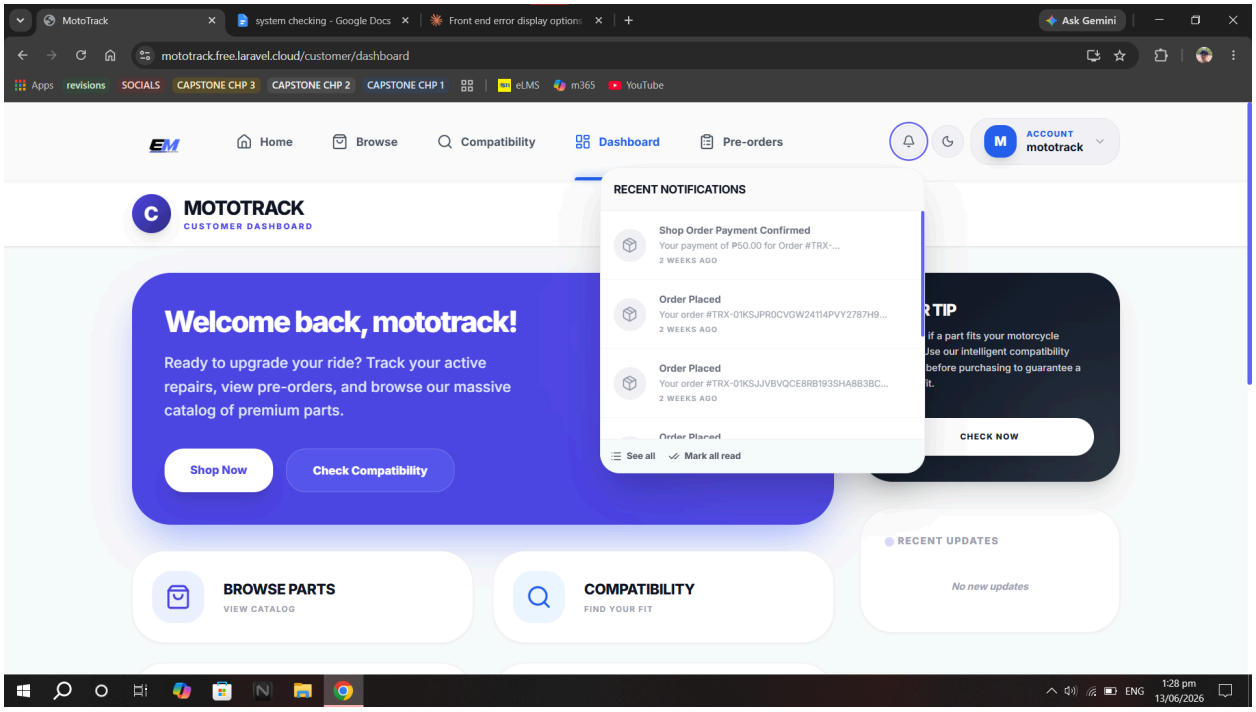

And yug dito sa login din pala, ayan oh, ewan bat ganyan,may highlight, basta check nalang pati white texts. On why naaapektuhan yung system pag naka dark mode ganon

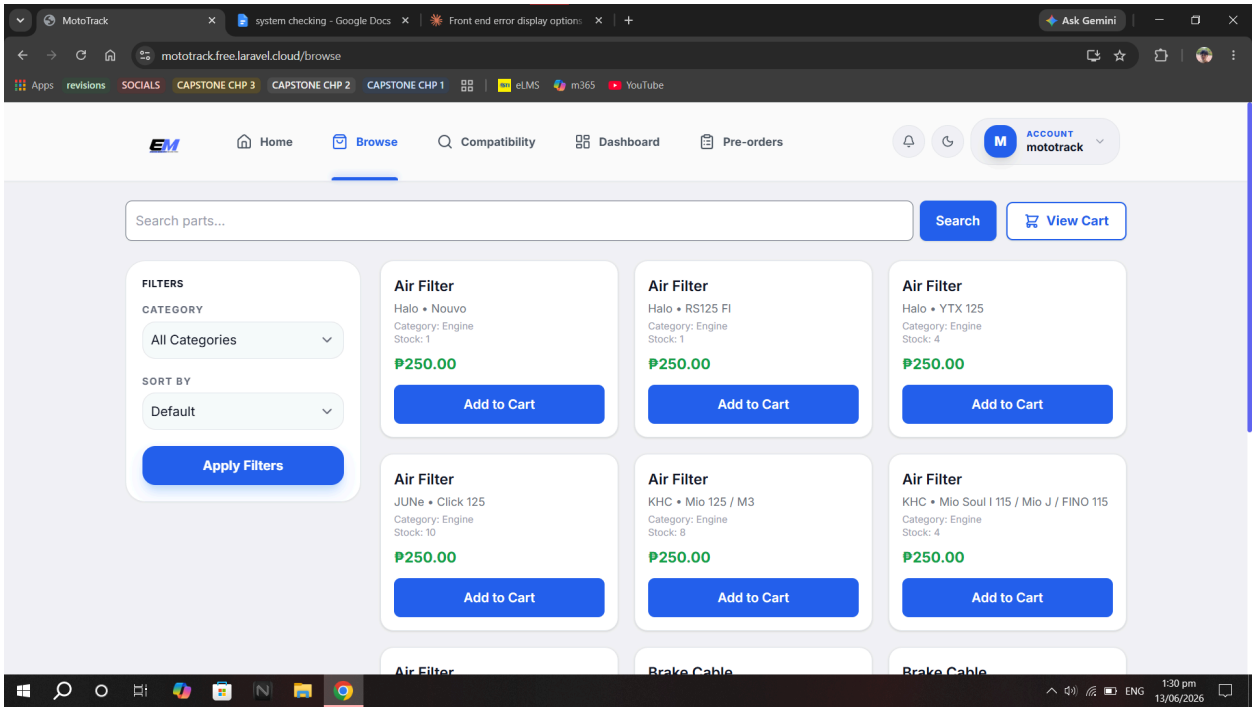

Based sa sinabi ko kanina, yung sa header, spacing din between the links sa header, di iisa, like yung browse and compatibility ang layo. Also yung sa “welcome back, mototrack!” palitan nalang na “welcome back, customer!”.

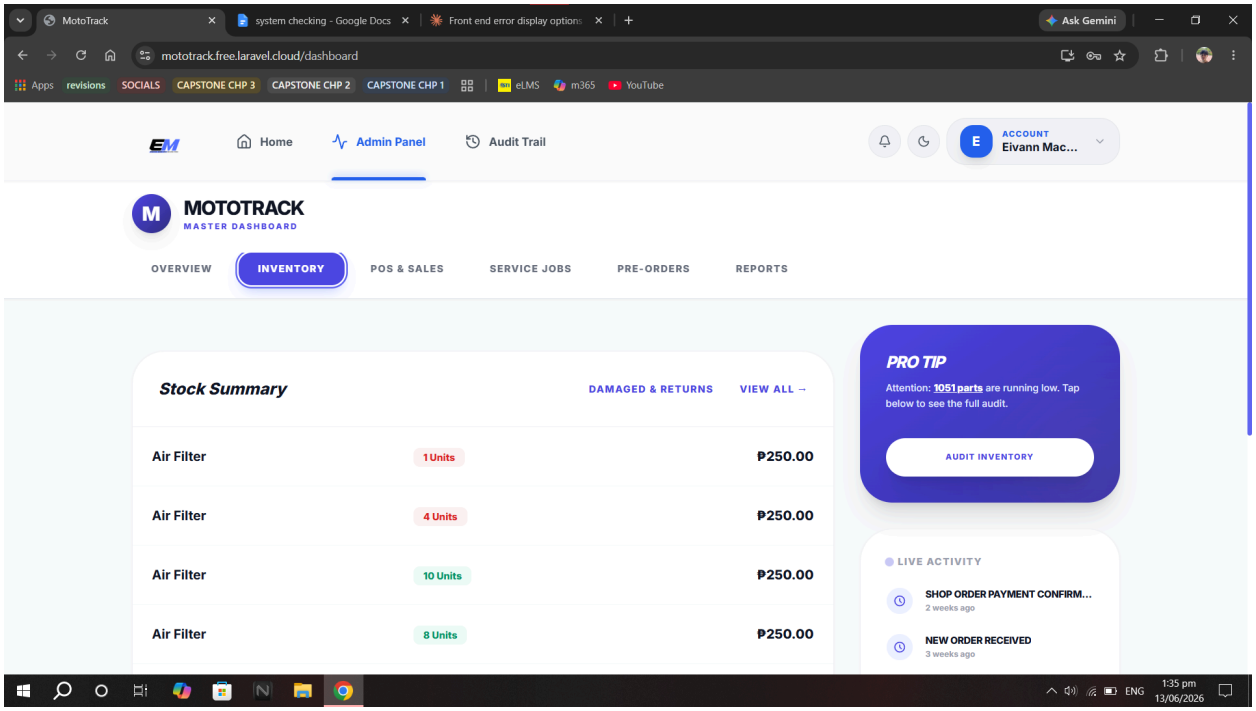

Here sa notif naman wala pang function yung sa “see all”

Yung dito sa products, kahit placeholders muna na mga images para ma visualize natin

Dito naman sa admin, hindi swak yung sa boxes, example nung clinick ko yung sa inventory, ganyan, putol. And same lang din sa kanina, yung notif and all

Yan muna, basta check lahat ng mga functions para sure tayoo. Check ulit ako next weekkk. Also yung mga pictures na ilalagay talaga sa landing page and products is asikasuhin pag di na busyy. Thank uuu
