USER SIDE

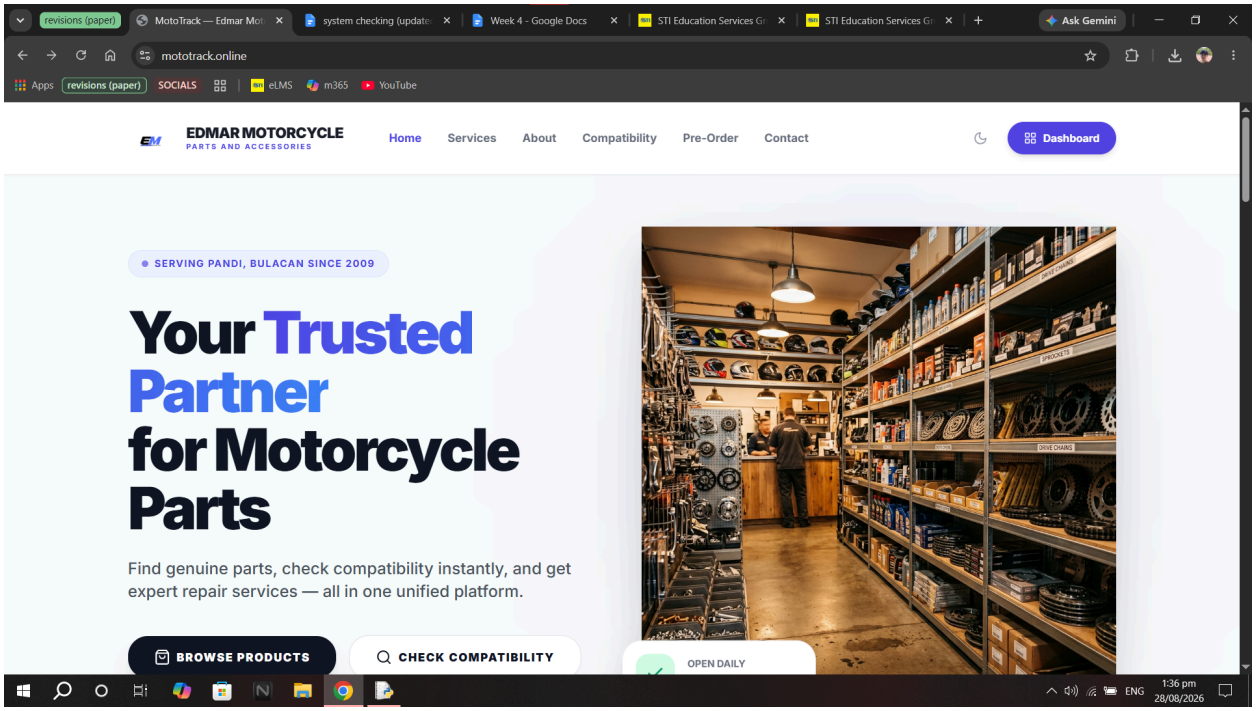

Paki ayos yung sa header, dapat di ba napupunta yon sa designated pag cliniclick, paayos nalang. Need maayos redirection pag cliniclick

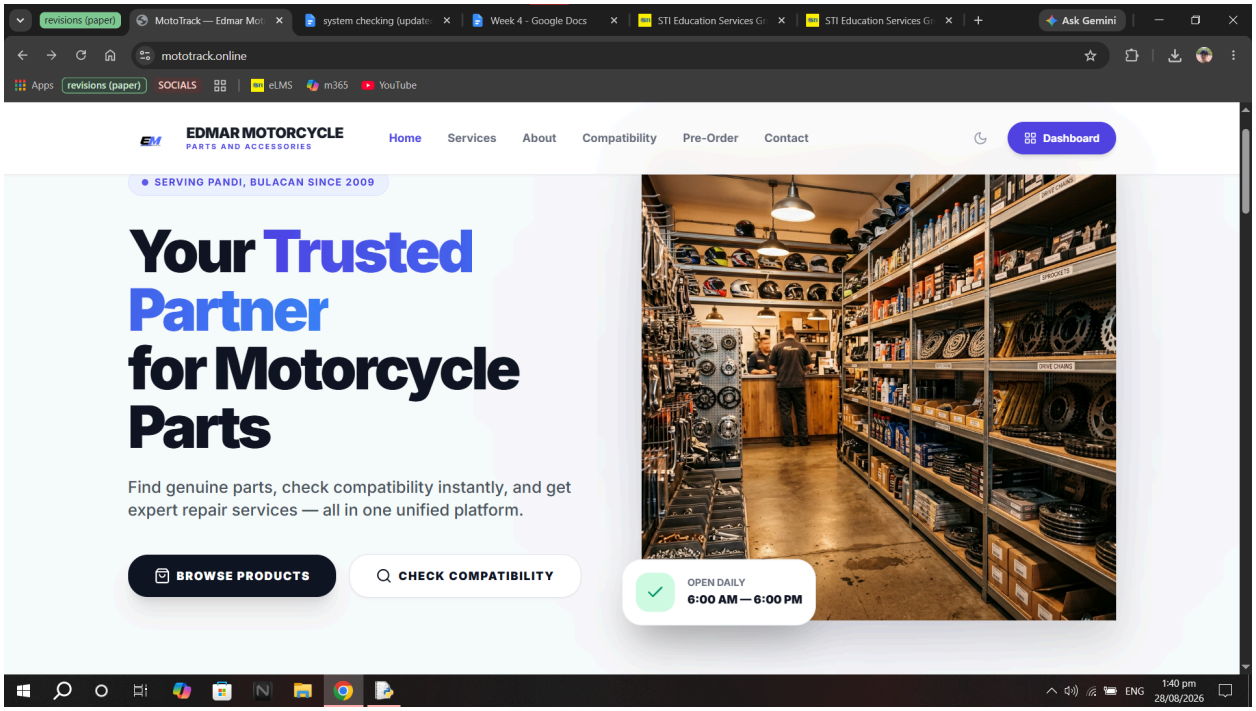

404 | Not Found

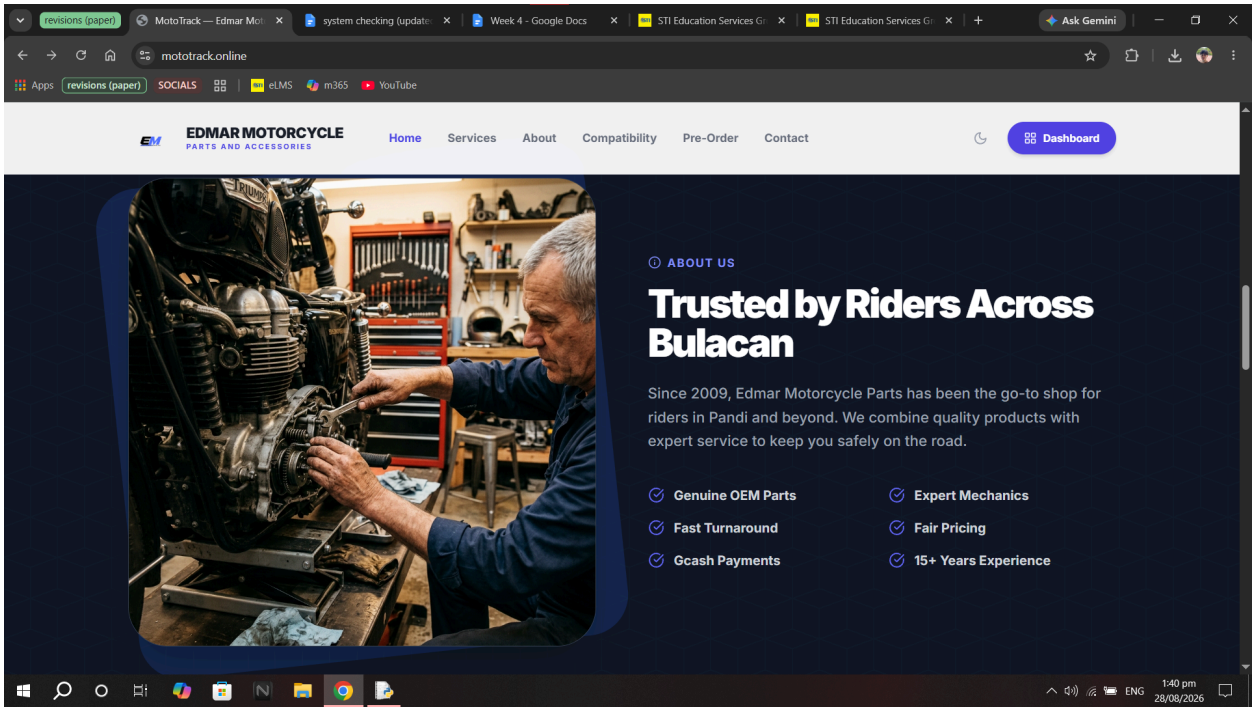

Etong mga nasa header. Tapos dapat hindi agad dashboard nakalagay diyan sa landing page. Magiging dashboard lang yan if nakapag register or login na yung user or admin. Dapat sign in or get started, or pwede siguro pag isahin nalang

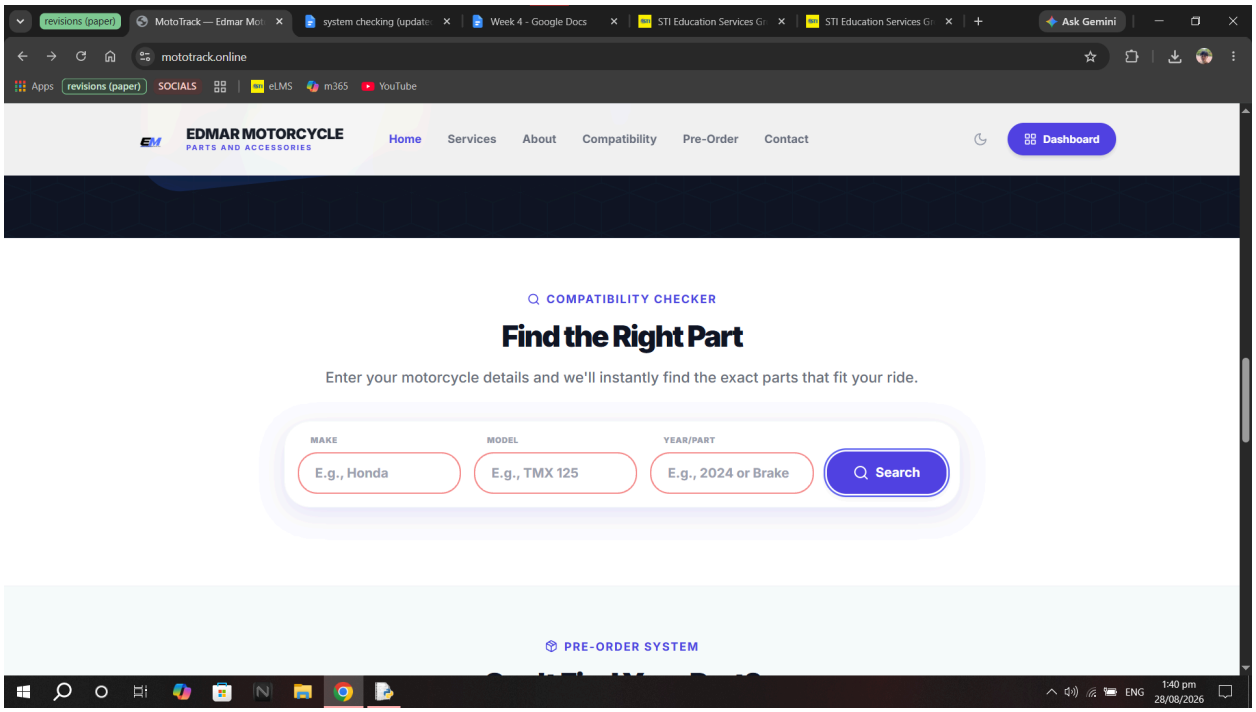

Tapos yung pictures pala dito papalitan na and yung sa logo. Nasa gc naman yon lahat and sa gdrive

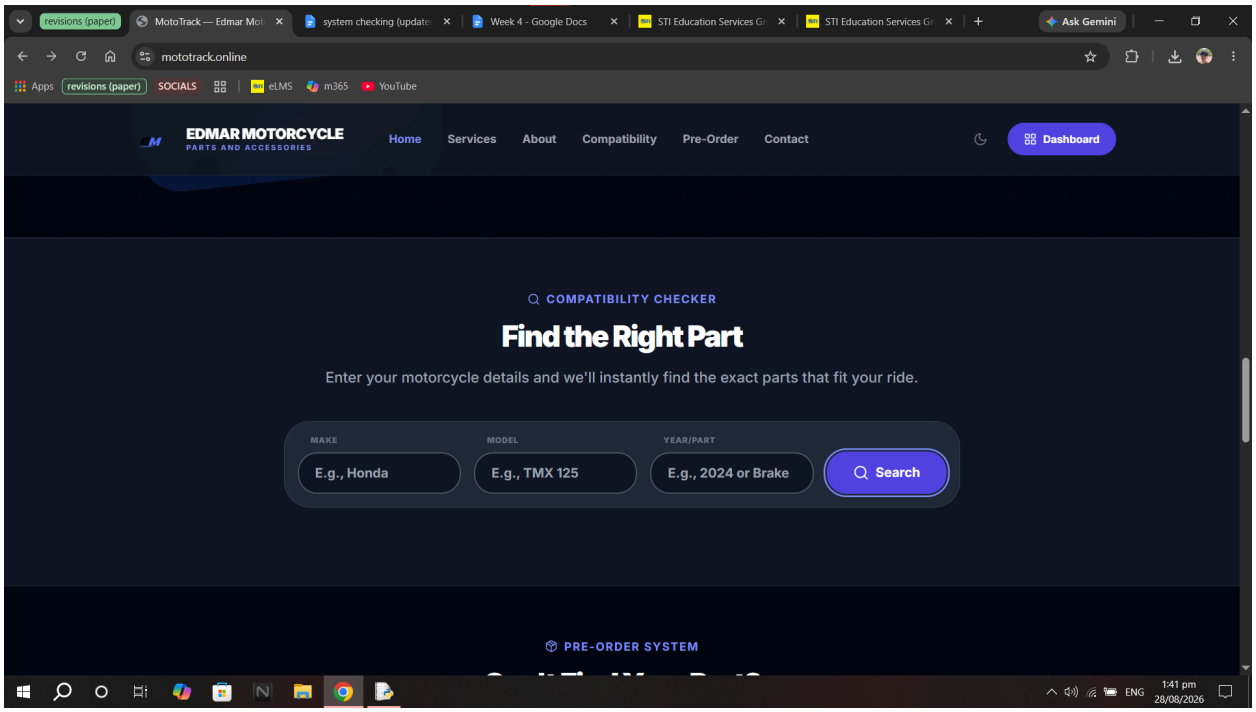

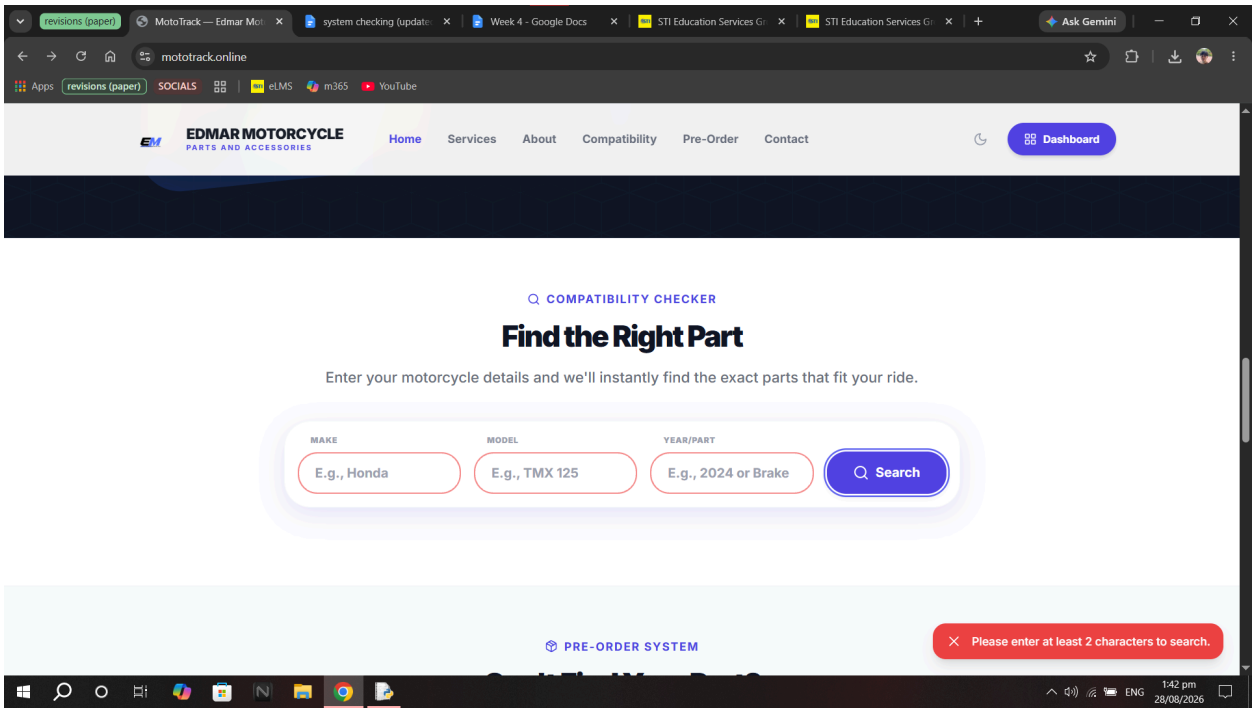

And yung dito sa compat checker, dapat hindi ganito yung kulay. Dapat default color pa yan, magiging red lang yung color if mali or gulo-gulo yung nilagay nung user.

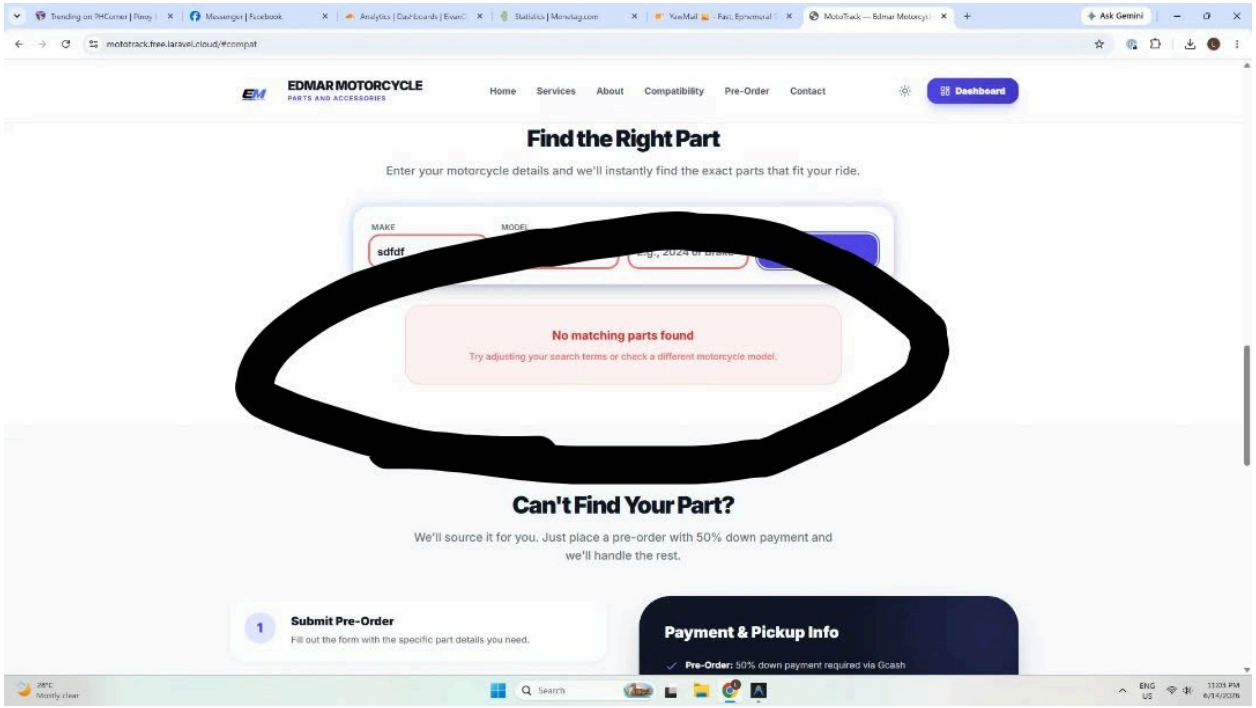

Eto parang ganito pag dark mode

Tapos eto pa pala sa compat checker, dapat hindi ganito yung lalabas. Yung nasa baba. Dapat yung

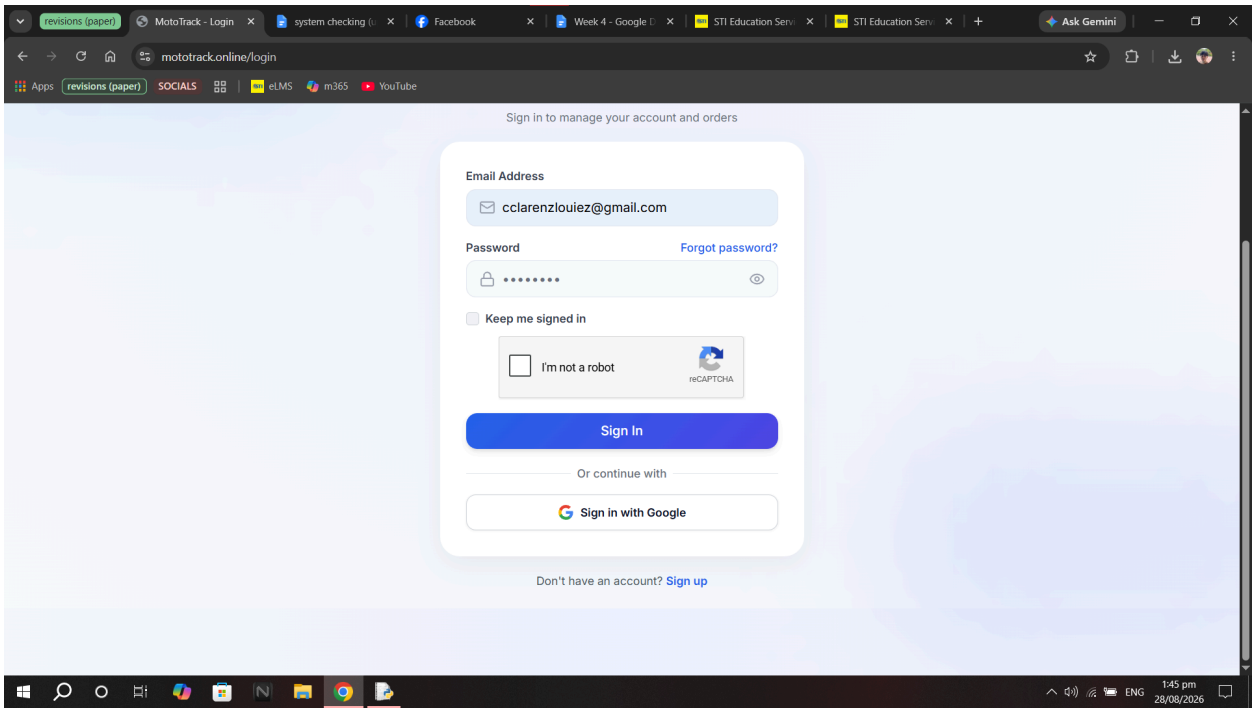

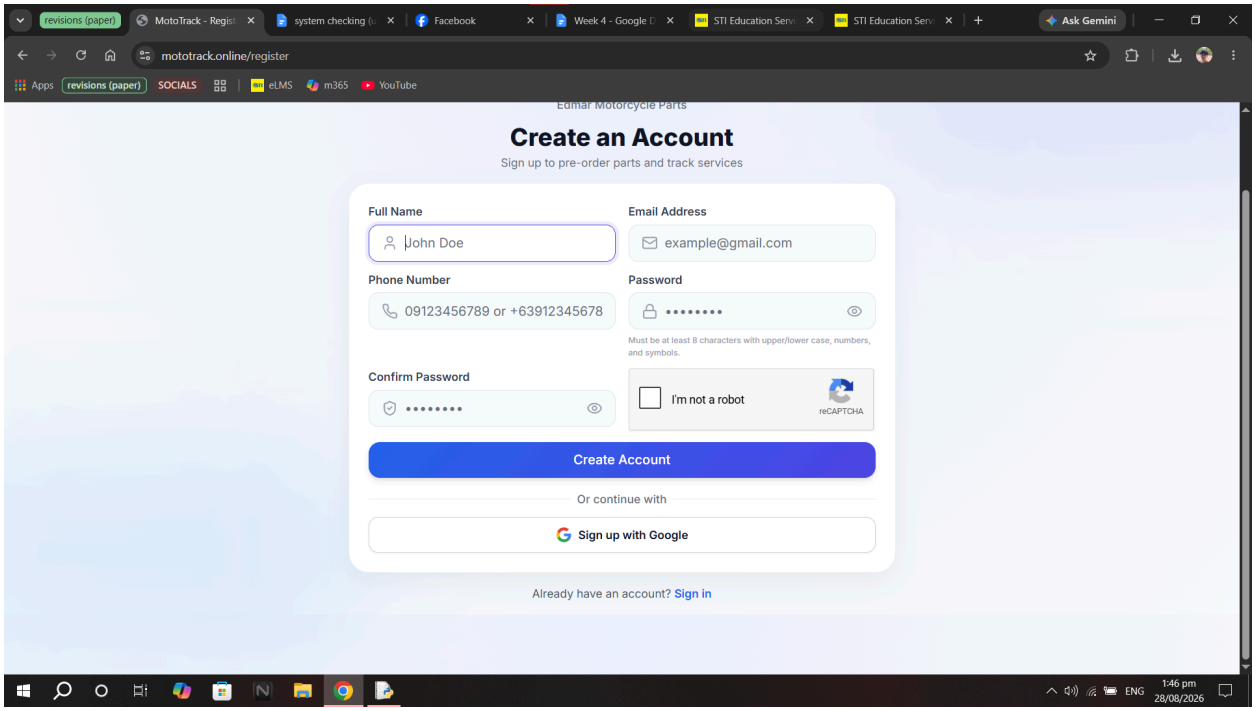

Eto dapat ganito kakalabasan. Eto yung sinend mo dati. Dapat ganito

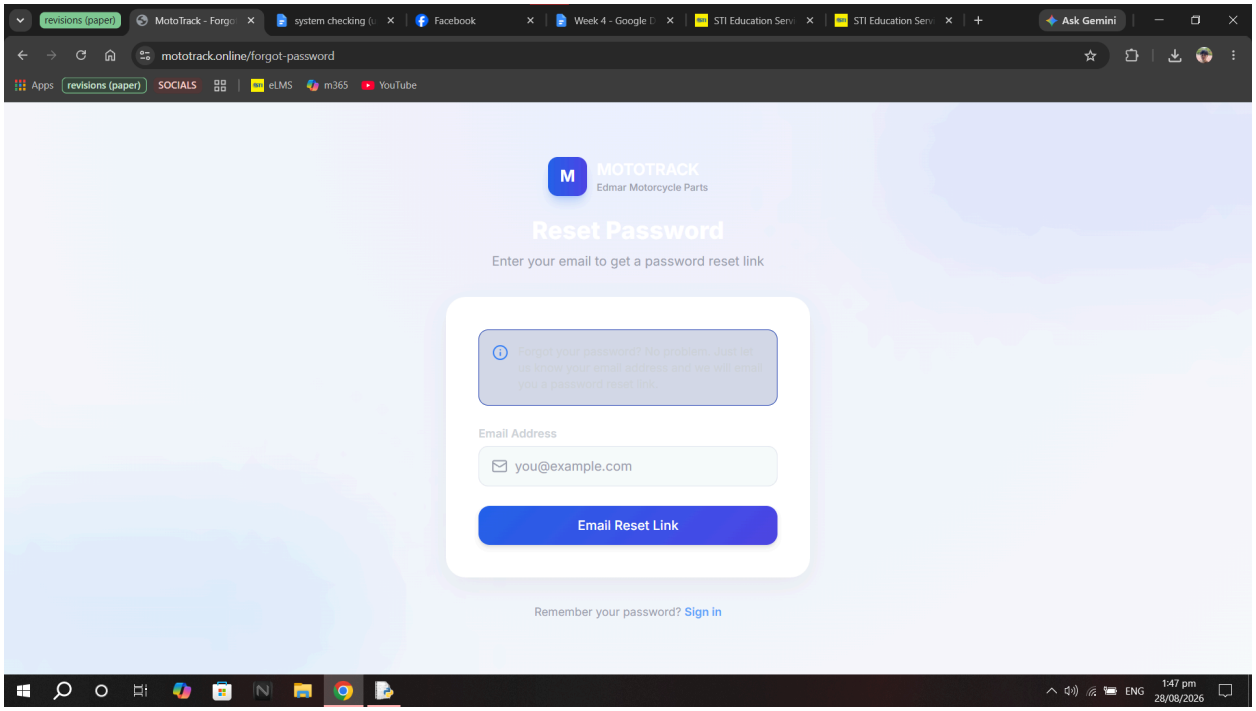

Tapos make sure na nauupdate rin yung sa dark mode ha, hindi lang yung sa light mode

Tapos yung dito, may excess space talaga pag login and register, dapat wala na excess space., As is na dapat. Ayon below nung **“don’t have an account? Sign up”**

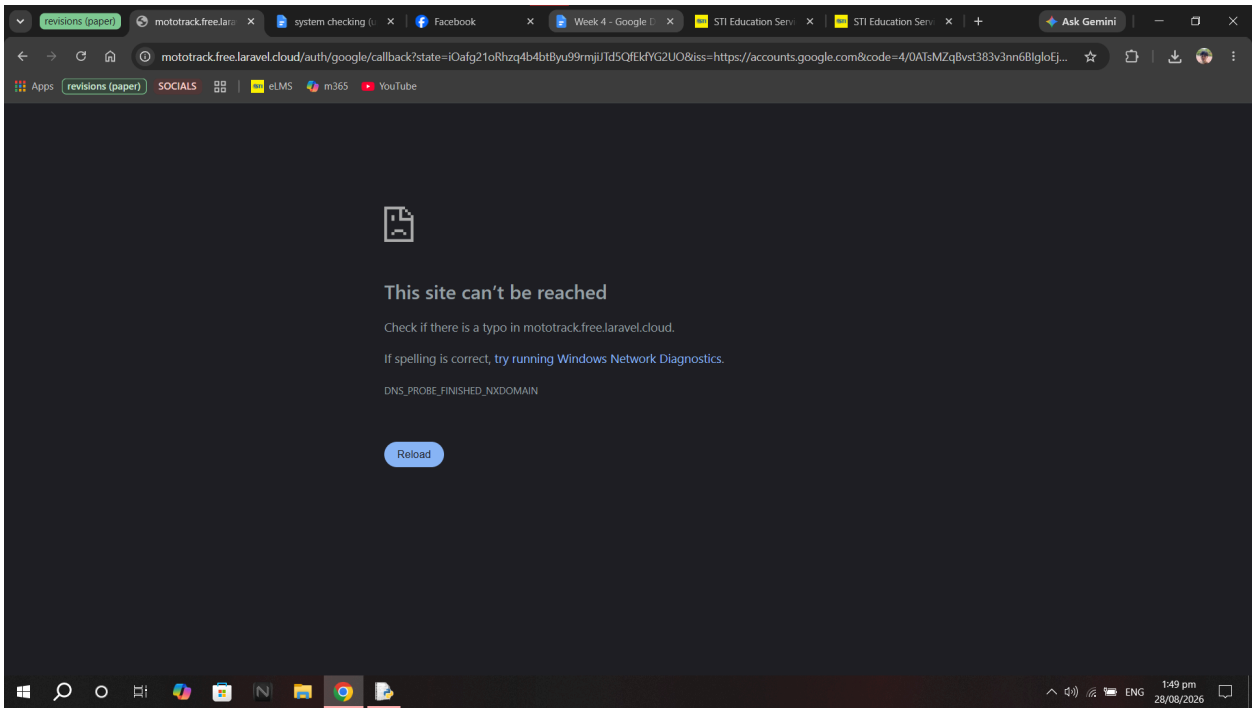

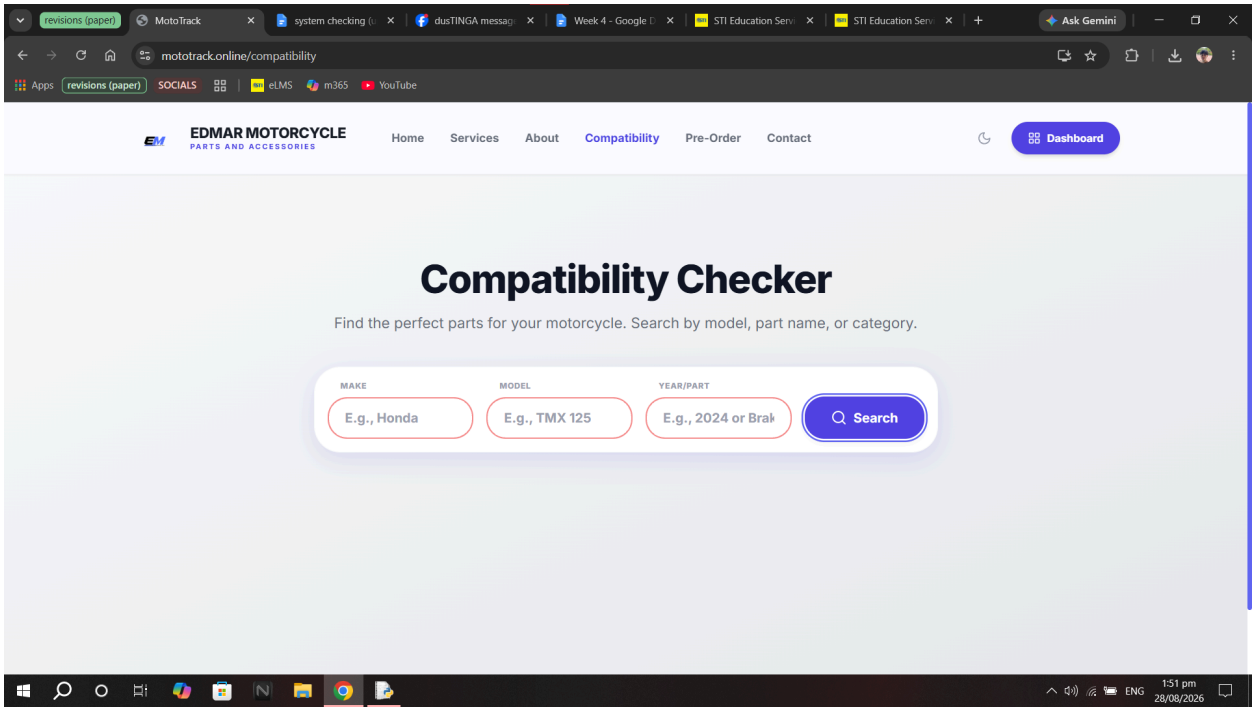

Eto pa pala, yung sa forgot password. Dapat default lang font color, dapat hindi naaapektuhan ng dark or light mode ng device na ginagamit nung users. Ayan oh hindi kita. Dapat maayos ulit. And wala nakalagay na logo

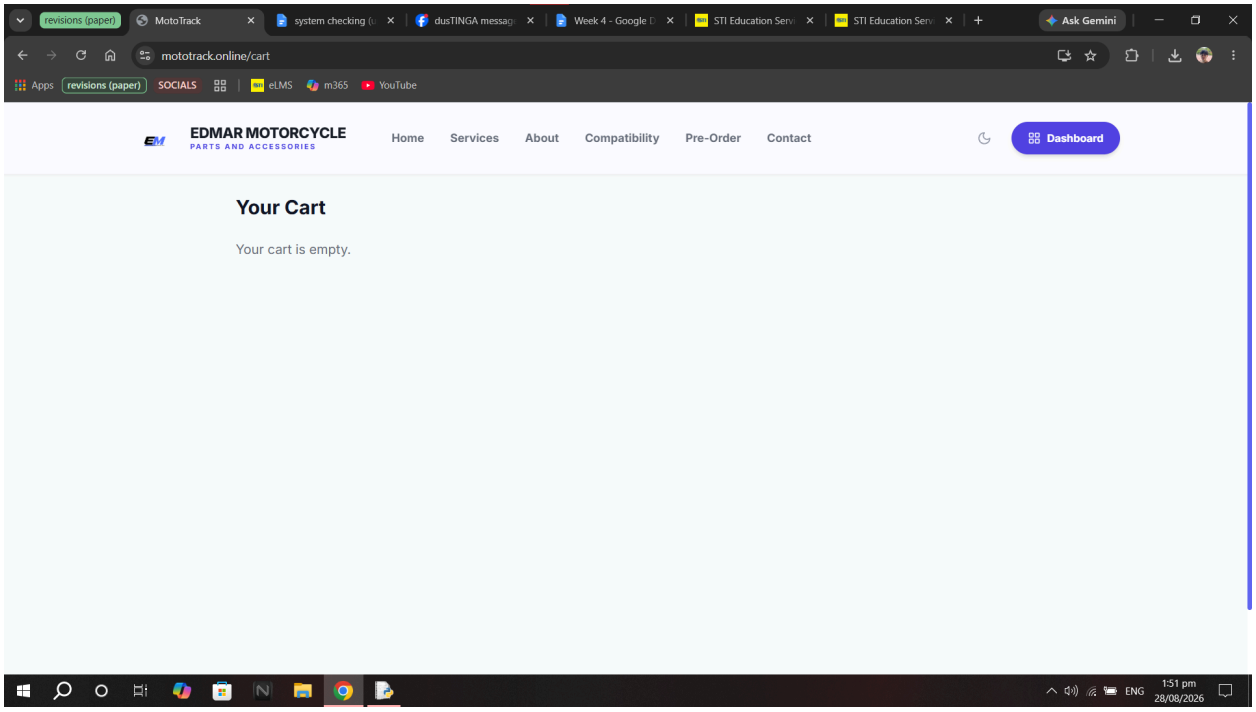

Tapos dito, tinry ko mag login ng email ko kaso eto lumabas

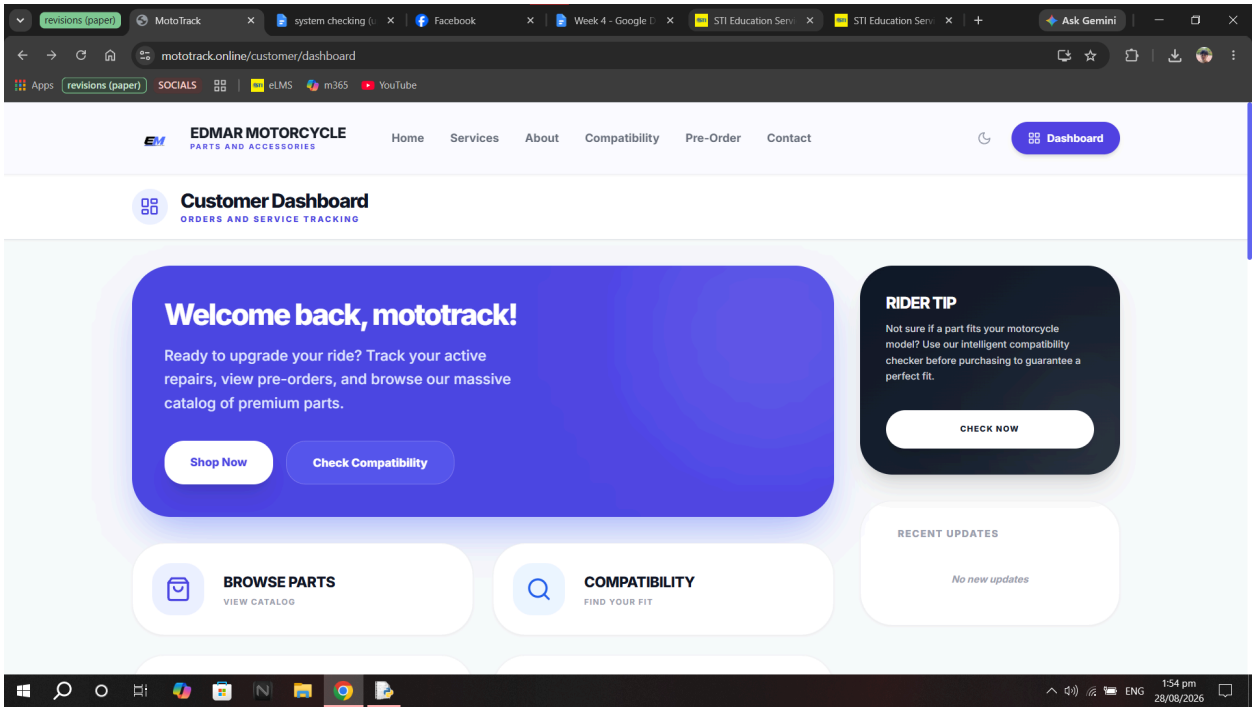

Eto sa dashboard yung customer, need rin baguhin

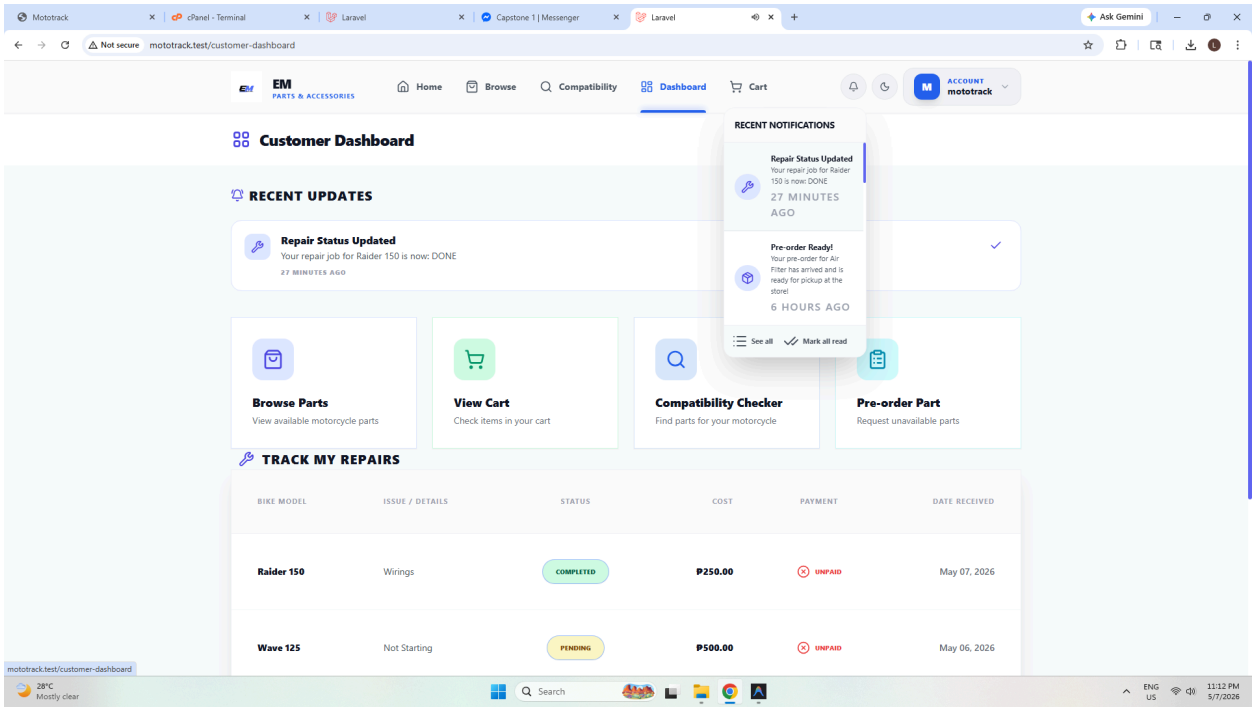

Tapos dito, much better if may text na nakalagay na ano “Shop now” tas mag rredirect don sa catalog ng mga products. Basta ganonnnn, ai nalang HAHAHA. Masyado kasi plain eh

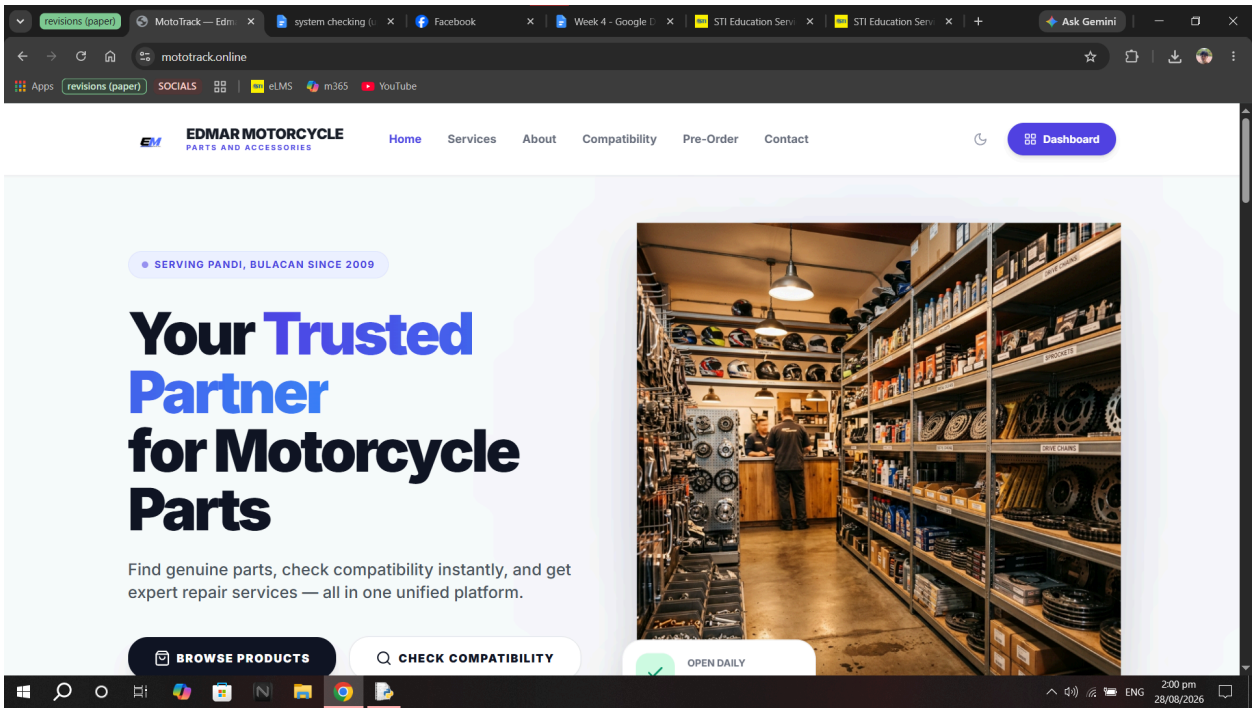

Yung dito rin pala sa customer dashboard, nawala yung notification and cart

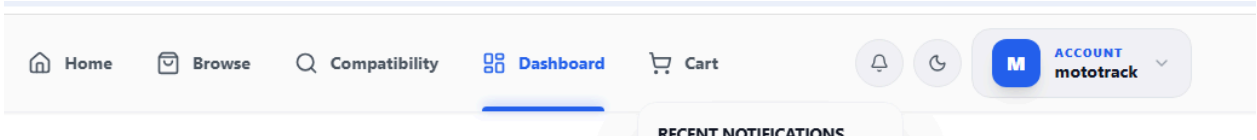

Eto yung dati oh, much better. Sinend mo yan dati, mas okay yung ganyan. May cart and notif, tas pag nakapag login is may ganon na sa gilid para mas mabilis log out pag nasa dashboard or landing page. Pabalik nung ganon. Yung sa header lang ha, hindi yung sa pinaka dashboard. ail nalang

For example dito, bumalik ako sa landing page pero di agad makapag logout kasi walang option to sign out/log out. And dapat may settings din sa customer dashboard para maedit nila account info nila ganon and mas efficient and convenient. Kahit kasi sa customer dashboard walang option para mag logout

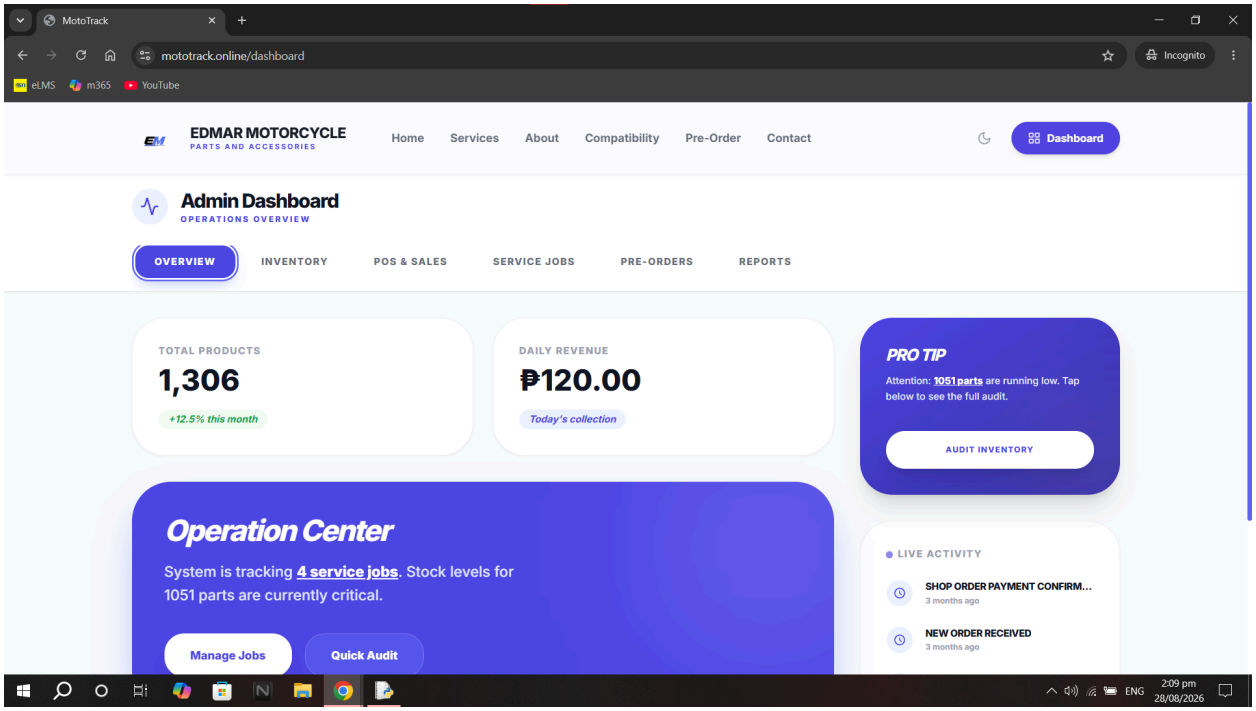

Etoooo dapat yung sa may account, may logout, settings basta ganon

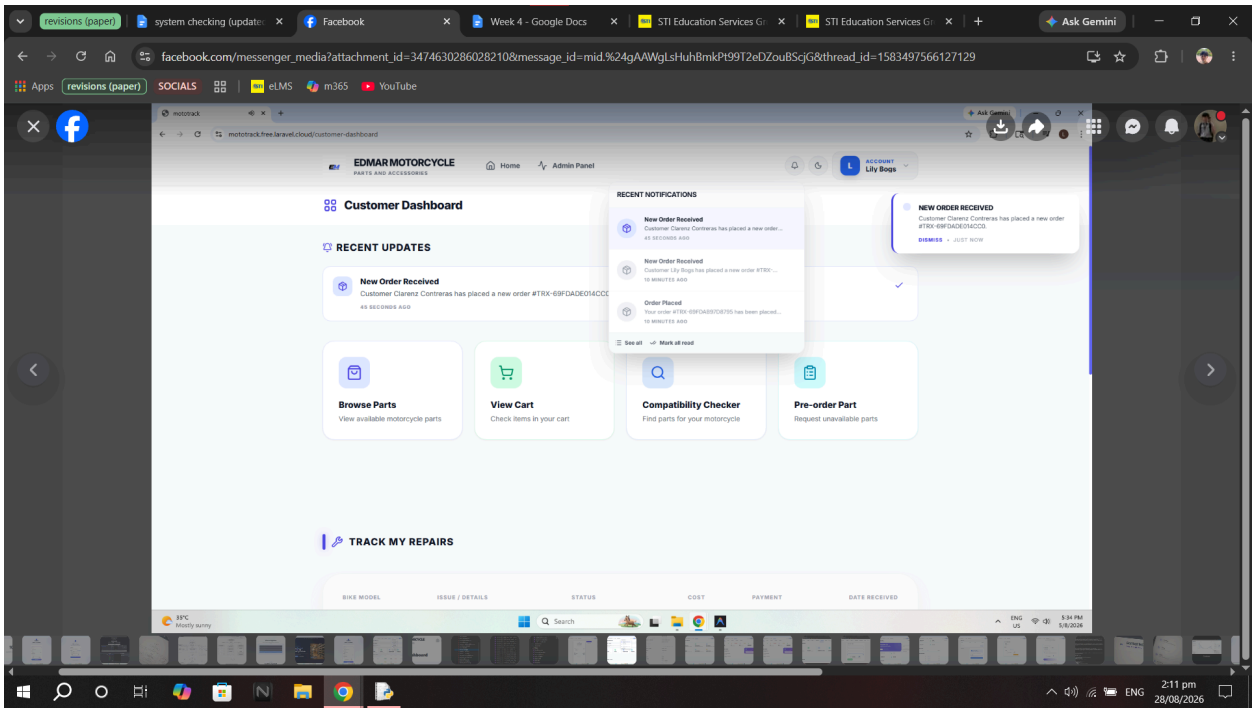

ADMIN SIDE

Same goes with admin side yung issue about sa login, need maiyayos excess space. Basta kung ano problems sa user side, need icheck admin side

Yung dito sa admin side naman, need maiayos din yung putol-putol na boxes. Tingnan mo yung sa overview, putol yung sa taas, ganun din sa inventory hanggang reports. Nawala rin yung notif button pati yung sa account. Tingnan mo next picture

Eto yung dating header sa admin. Need maibalik yung sa notif, sa may account (same issue sa user side) and yung admin panel kung ano man yan. Kasi di naman need nung owner malaman yung services, compat, pre order and contact kasi sila mismo yon. Ibalik yung **“home”** and **“admin panel”** sa header sa admin dashboard. Basta dapat di affected yung header sa landing page sa header sa customer and admin dashboard. Separate dapat yon

So far yung palang sa admin side, pero paki check pa rin lahat. Basta need na mailagay lahat nung pictures, yung sa landing page, yung logo, if may di pa nailalagay sa product catalog. Mga fonts, font colors paki tingnan. Spacing, colors nung sa compat checker and ayusin din yung mismong compat checker. And lahat nung mga nandito sa docs. Dapat mailagay na lahat para macheck natin kalalabasan. Nasa gc yung gdrive for pictures nung products and nung mismong shop and yung sa canva link para sa logo.
